Signals generation progress
OAM generator (microstrip antenna)
Airy EM lens (HDPE or metasurfaces)
Receiving area
Receiving processing
0 degrees phase-shifted
Signal source
Amplifier
Beams
Hybrid coupler
LNA
Mixer
LNA
Mixer
Splitter
Filters
Horn/waveguide antennas
180 degrees phase-shifted
Mixer
Mixer
AWG
(a)
Laptop with MATLAB
A/D and data collectors(USRP)
Signal source
Splitter
(b)
Airy EM lens
Multi-mode OAM beams generator
One antenna for Mode 0 reception
Signal source
(c)
Airy EM lens
Antennas for Mode +1 and +2 reception
Converge transmit
Hybrid coupler
Multi-mode OAM beams generator
(UCA with phase-shifting networks)
