

# Leave-1-out (10 movies): 9 train X 10 test

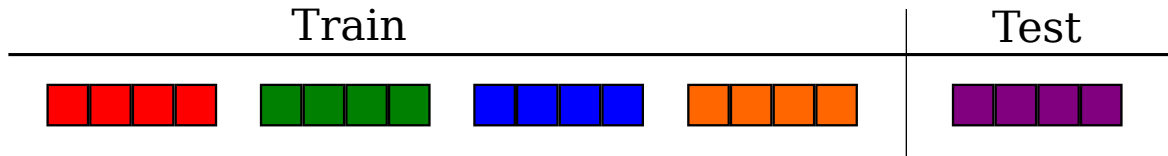

(preliminary experiments)

SVM cost:  $(9 \cdot 8^2 + 9^2) \cdot 10 = 6570$

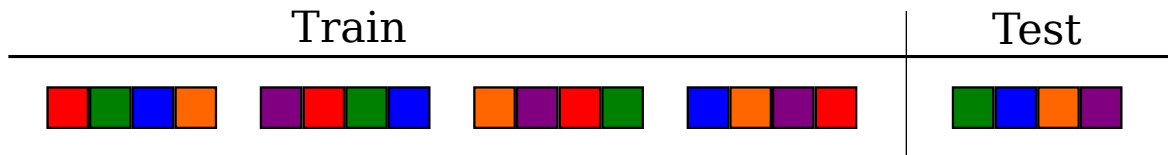

# Leave 1 franchise out: 4 train X 5 test

SVM cost:  $(4 \cdot 12^2 + 16^2) \cdot 5 = 4160$

# Leave 4 movies out: 4 train X 5 test

SVM cost:  $(4 \cdot 12^2 + 16^2) \cdot 5 = 4160$
