

①

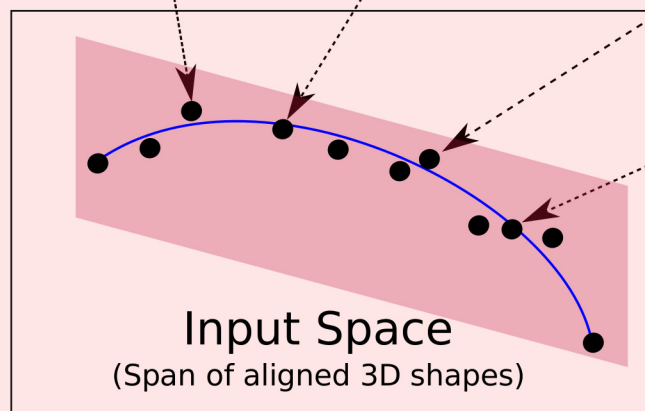

Causal Factors

3D shapes (S_i) and the projection matrices (R_i)

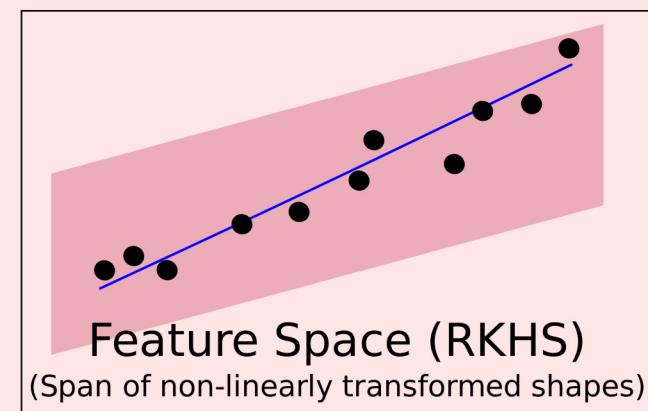

$$W_i = R_i S_i$$

②

Observations

2D projections (W_i) in the image

$$S_i \longrightarrow \phi(S_i)$$

③

Dimensionality Regularizer

Penalizing rank in the feature space

$$\text{Dimensionality of } S \sim \|\phi(S)\|_*$$
