

Figure 10 is a bar chart showing the power and capacity of the power plant on January 23, 24, and 25, 2014. The y-axis represents power in kW, ranging from 0 to 30. The x-axis shows the dates. Blue bars represent power, and red hatched bars represent capacity. Power is generally higher than capacity, with peaks around 29 kW. Capacity is mostly between 5 and 15 kW.

The chart displays the power consumption and capacity over a three-day period. The Y-axis represents power in kW, ranging from 0 to 30. The X-axis shows dates from 23-01-14 to 25-01-14. Power is shown in blue bars, and Capacity is shown in red hatched bars. The chart is divided into three sections by vertical dashed lines corresponding to the dates 23-01-14, 24-01-14, and 25-01-14. Power peaks are visible on 23-01-14 and 24-01-14, while Capacity is only present on 23-01-14.

The chart displays the Power and Capacity (kW) for the period from January 23, 2014, to January 25, 2014. The y-axis represents power in kW, ranging from 0 to 30. The x-axis shows the dates. Power is represented by blue bars, and Capacity is represented by red hatched bars. Power is generally higher than Capacity, especially during the night hours. The chart is divided into three sections by vertical dashed lines corresponding to the dates 23-01-14, 24-01-14, and 25-01-14.
