

Reclassification Step:

training on the given training data + generated pseudo-negatives

Initial Classification
(given training data)

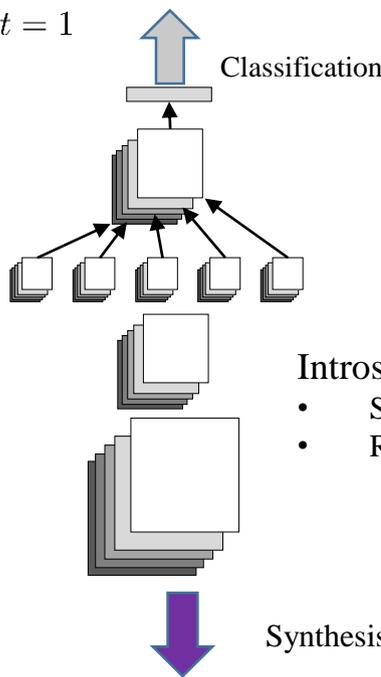

$t = 1$

$t = 2$

$t = T$

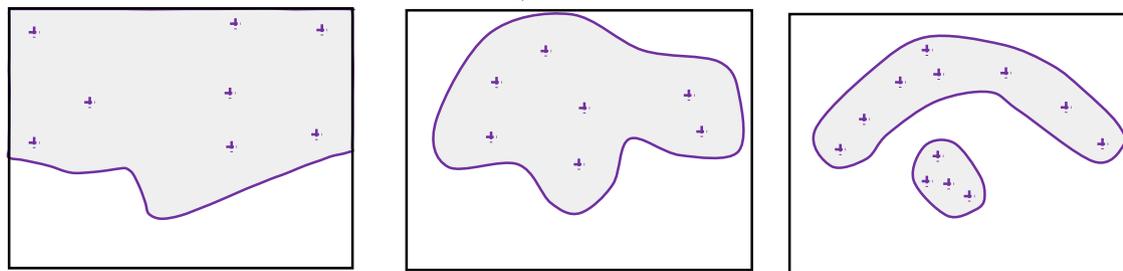

Final Classification
(given training data +
self-generated
pseudo-negatives)

Convolutional Neural Networks

Introspective Convolutional Networks:

- Synthesis
- Reclassification

$t = 0$

$t = 1$

$t = 2$

Synthesis Step:

synthesize pseudo-negative samples
