

The image shows a mathematical equation involving Feynman diagrams. On the left, there is a diagram consisting of a horizontal dashed line. At each end of this dashed line is a solid horizontal line segment. A solid curved line (an arc) connects the two vertices where the solid lines meet the dashed line, forming a loop above the dashed line. This diagram is followed by a plus sign. To the right of the plus sign is another diagram: a single solid horizontal line with a single solid black dot (a vertex) located at its center. To the right of this second diagram is an equals sign, followed by the number 0.

$$\text{Diagram 1} + \text{Diagram 2} = 0$$
