

MODEL

The additive model below was trained to predict bike demand. Each plot describes a variable on the x-axis and predicted bike demand on the y-axis. Hour denotes hour-of-day, i.e. 0, 1, 2, ... 23. Temperature is in Celsius. Year has 2 possible values: 2011, 2012. Season has 4 possible values: Spring, Summer, Fall, Winter.
