

Merger trees of DM haloes: N -body simulations (Ishiyama+15)

radiative cooling
AGN (“radio-mode”) & UV feedback

Mergers of galaxies
Disk instability

NO

YES

Star formation in disc
SN feedback

starburst \rightarrow bulge growth
SMBH growth
SN feedback

chemical evolution

disk size
rotation velocity

stellar population

bulge size
velocity dispersion

dust attenuation

AGN properties

observable properties of galaxies & AGNs
