

Vulnerability Models (Section-III)

$$AVF_c = \frac{\sum_{n=0}^N VulnerableBits}{TotalBits \times N}$$

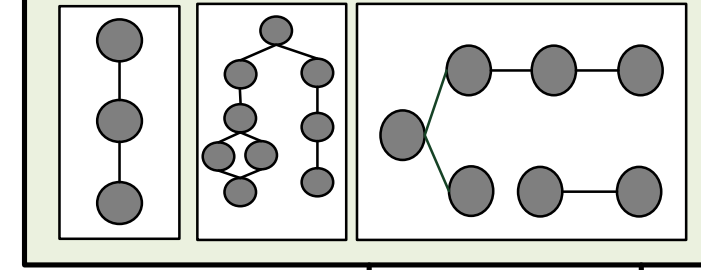

$$IVI_i = \frac{\sum_{c \in W} IVI_{ic} \times A_c \times P_{fault}(c)}{\sum_{c \in W} A_c}$$

$$FPVF_W = \frac{\sum_{vi \in C} VulnerableBits_i \times VulnerableTime_i}{\sum_{vi \in C} TotalTime_i \times TotalTime_i}$$

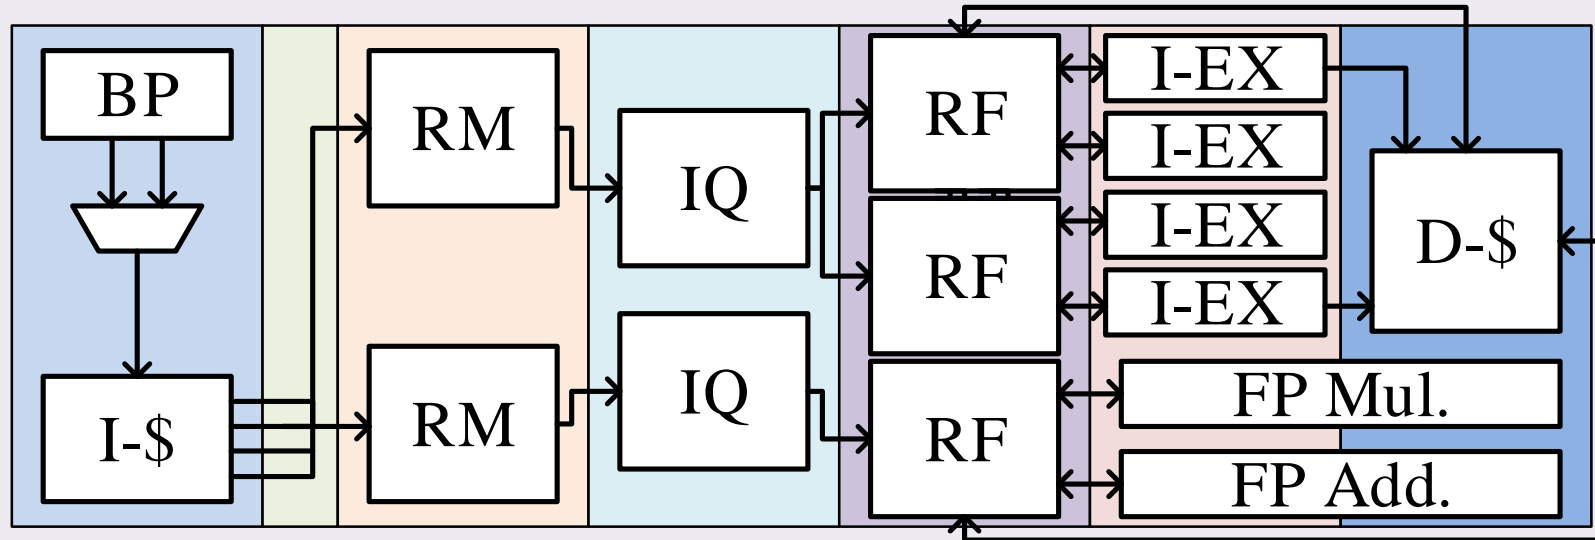

Fault Injection Engine (Section IV-D)

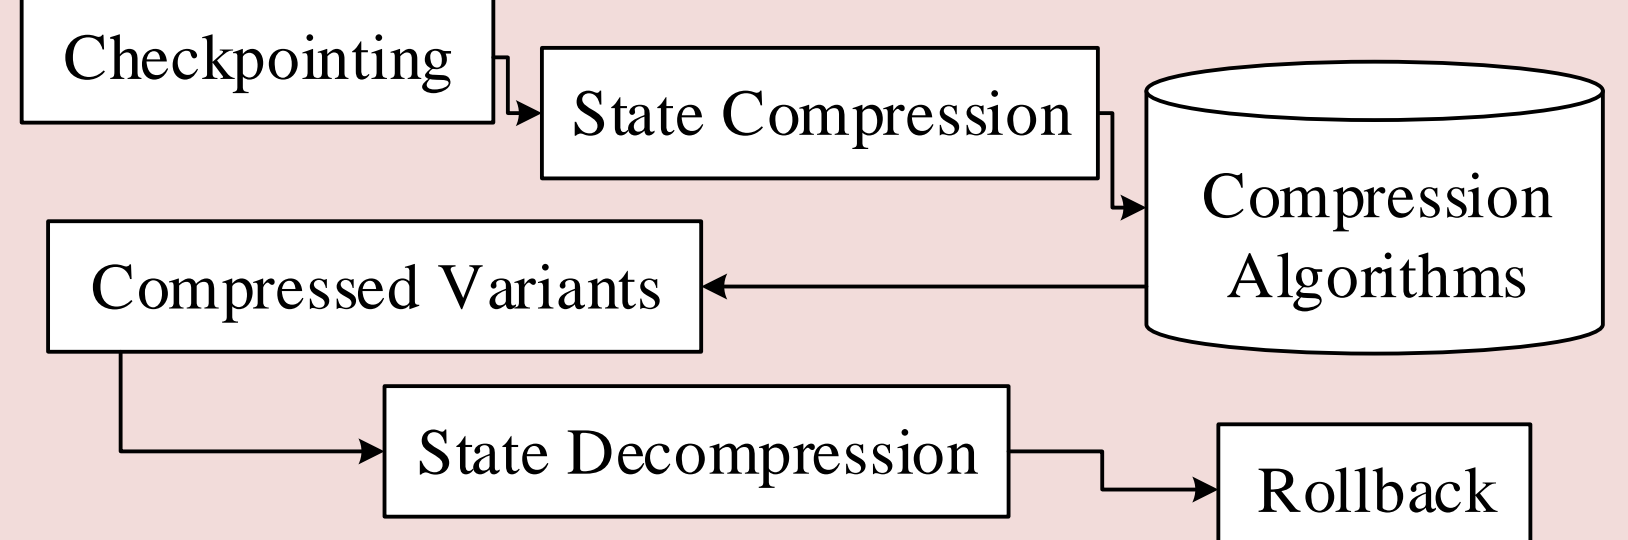

Set of Applications

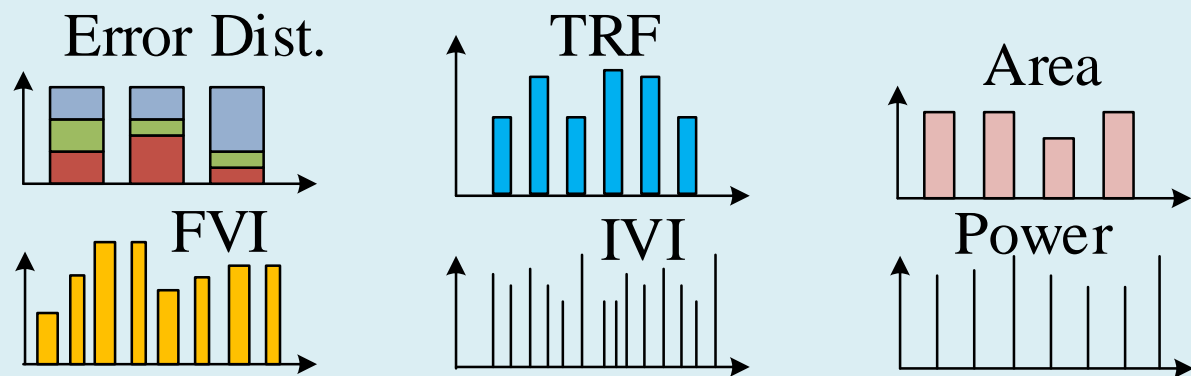

ALPHA 21264 Processor (Section II)

Checkpointing and Rollback (Section IV-F)

Vulnerability and Hardware Analysis (Section IV-C)

Heterogeneous Reliability Modes (Section IV-E)
