OSEA

Statistics and
Machine Learning

Linear interpolation to remesh magnetic maps to a uniform grid (see, *Toth et al., 2011*).

Definition of WS, DCHB, and WSA relation according to *Riley et al., 2015*.

Field line tracing using the 4th-order Runge-Kutta method.

Coupling of the coronal model with the HUX model (see, *Riley and Lionello, 2011*).

Implementation of an ensemble modeling approach (see, *Owens and Riley, 2017*).

Application of an automated forecast validation tool (see, *Reiss et al., 2015*).
