

Diagram illustrating a morphism $\mathcal{O} \in \text{Hom}_B(\mathbb{1}, \mathbb{W}_V)$. A vertical dashed blue line represents the unit object $\mathbb{1}$, with the label $\mathbb{1}$ at the bottom. A vertical solid teal line represents the object \mathbb{W}_V , with the label \mathbb{W}_V at the top. A black dot representing the morphism \mathcal{O} is located at the intersection of the two lines.

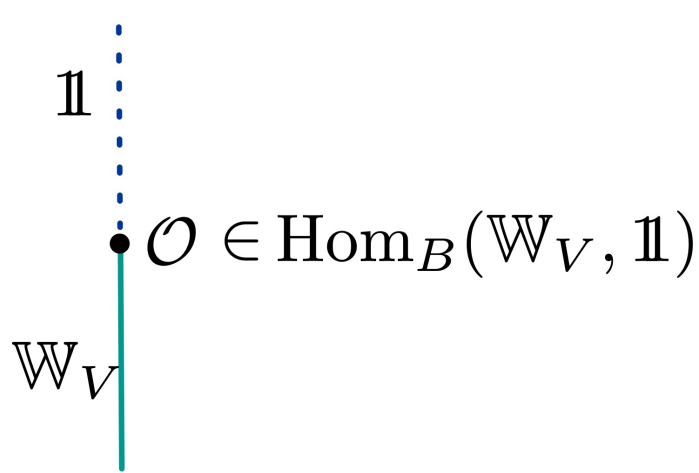

Diagram illustrating a morphism $\mathcal{O} \in \text{Hom}_B(\mathbb{W}_V, \mathbb{1})$. A vertical solid teal line represents the object \mathbb{W}_V , with the label \mathbb{W}_V at the bottom. A vertical dashed blue line represents the unit object $\mathbb{1}$, with the label $\mathbb{1}$ at the top. A black dot representing the morphism \mathcal{O} is located at the intersection of the two lines.

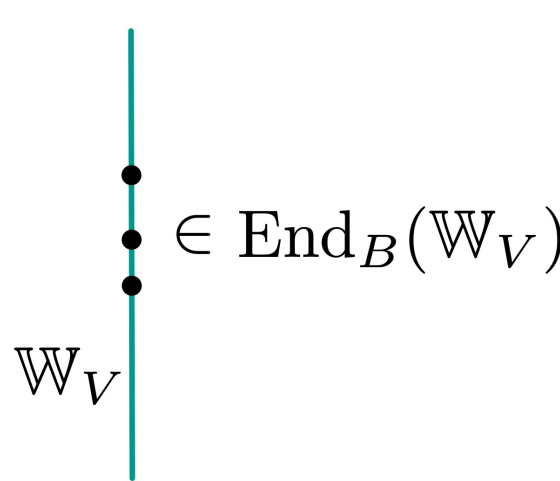

Diagram illustrating an endomorphism $\in \text{End}_B(\mathbb{W}_V)$. A vertical solid teal line represents the object \mathbb{W}_V , with the label \mathbb{W}_V at the bottom. Three black dots representing the endomorphism are located on the teal line.
