

*Model Parameters*

### Simplifications

- Channel Behavior
- Interference
- Traffic Patterns

### Unknown MNO Internals

- Scheduling Policy
- Handover Policy
- eNB Configurations

### Simulator-specific Non-implemented Features

- Carrier Aggregation
- Transmit Power Control

*Assumptions & Measurements*

**Real World**

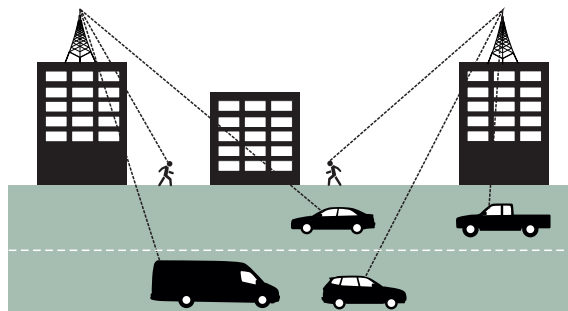

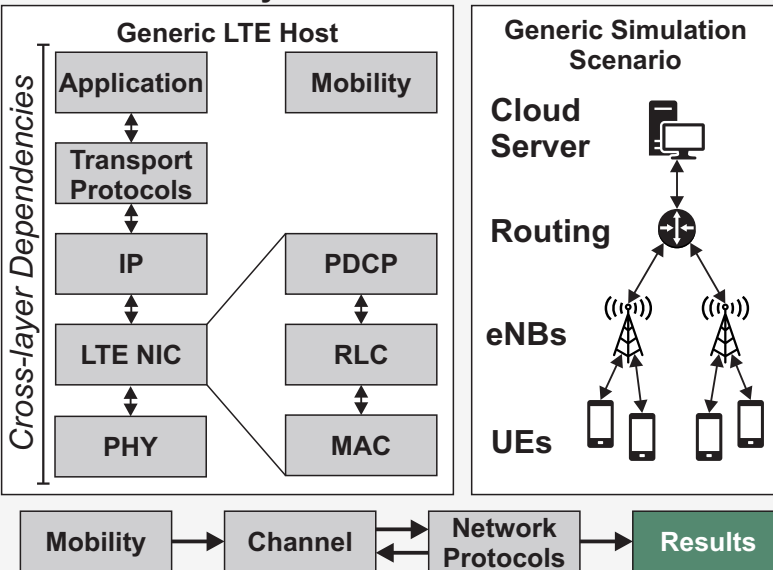

*Measurements*

### Learning Data

- Mobility
- Network Quality
- End-to-end Indicators

*Machine Learning*

## DES-based System-level Network Simulation

### Decision Criteria

- Modeling Accuracy
- Computational Efficiency

Context Traces

Machine Learning Models

Results

**Proposed Data-driven Network Simulation(DDNS)**
