

N: batch size
M: average number of lookups per table
Index array: $(i_1, i_2, \dots, i_{N \cdot M})$
Offset array: (o_1, o_2, \dots, o_N)
Output array: (r_1, r_2, \dots, r_N)

00 #pseudo code of SparseLengthsSum operation
01 **for** $a \leftarrow 1$ **to** N :
02 $r_a \leftarrow 0$
03 **for** $b \leftarrow o_a$ **to** $o_{a+1} - 1$:
04 $r_a \leftarrow r_a + \text{table}[i_b]$
