

## Benefit

## Methods

## Open issues

Ensuring 1 ms  
delay in RANs

State-of-art:  
5G NR

No E2E delay  
guarantee

Ensuring E2E  
performance

Cross-layer  
design

High complexity  
algorithms

Fast inference  
for real-time  
implementation

Deep learning

Long training  
phase

Improving  
learning  
efficiency

Knowledge +  
deep learning

Model  
mismatch

Good initial  
performance &  
fast adaptation

Fine-tuning in  
real-world  
systems
