

HUMAN EVALUATION WEBSITE

You will watch a video clip for 10 seconds. Please determine whether there is a audio-visual correspondence in the video. In other words, decide whether the sound source is visible or inferable from the visual context.

Guidelines for the edge cases

Please mark the below cases with YES

- Correspondence in Artificial Scenes (e.g. gunshot sound in FPS games)
- Mixed Sounds (e.g. music with loud background noise)
- Immobile Sound Source (e.g. engine sound from idle car)

Please mark the below case with NO

- Absent Sound Source (e.g. music from an instrument out of the scene)
