

Training Vol 1

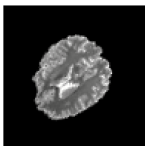

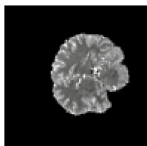

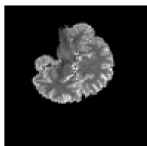

Training Vol 2

Trained on just these two volumes  
our method generalizes  
to other rotations.

$$\begin{bmatrix} 0.291 & -0.46 & 0.842 & 5.0 \\ 0.837 & -0.30 & -0.46 & 5.0 \\ 0.462 & 0.837 & 0.292 & 5.0 \end{bmatrix}$$

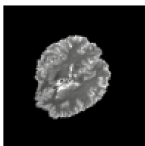

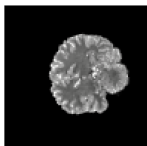

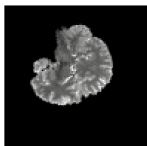

Test Volume

$$\begin{bmatrix} -0.84 & 0.52 & 0.15 & 3.7 \\ -0.49 & -0.61 & -0.62 & 2.8 \\ -0.22 & -0.59 & 0.77 & -1 \end{bmatrix}$$

Real test-case transformation.

Ref→Approx

$$\begin{bmatrix} -0.82 & 0.55 & 0.14 & 3.0 \\ -0.52 & -0.63 & -0.58 & 0.1 \\ -0.24 & -0.55 & 0.80 & -2.4 \end{bmatrix}$$

Approx. output by our method.
