

The image shows a 12x12 grid. The first column is entirely green. The remaining 11 columns are white. A diagonal sequence of colored squares runs from the top-left to the bottom-right, starting from the second row and second column. This sequence consists of alternating light blue and dark blue squares, representing a chromatic scale. The sequence starts with a light blue square at (2,2), followed by a dark blue square at (3,3), and continues this pattern until the bottom-right corner at (12,12), which is a dark blue square.
