

## Construction

image attributes

gender	hair color	facial hair	glasses	...
--------	------------	-------------	---------	-----

pick domain-specific and shared attributes;  
filter the original dataset accordingly

### Domain A

gender	hair color	facial hair	glasses	...
fixed (female)	domain-specific	fixed (no)	shared	shared

### Domain B

gender	hair color	facial hair	glasses	...
fixed (male)	fixed (black)	domain-specific	shared	shared

## Evaluation

random **input**  
image from A

female	blond	no facial hair	...
--------	-------	----------------	-----

random **guide**  
image from B

male	black hair	beard	..
------	------------	-------	----

**expected** attributes of  
the A2B translated image

male	black hair	beard	...
fixed		specific	shared

**predicted** attributes of  
the A2B translated image

male	black hair	no beard	...
------	------------	----------	-----
