

Generalist Pre-Training (Fully-Supervised)

$$\begin{aligned} \mathbf{x} &= \mathbf{s} + \mathbf{n}; \quad \mathbf{s} \in \mathbb{G}_{\text{tr}}, \mathbf{n} \in \mathbb{N}_{\text{tr}} \\ \mathbf{y} &= f_{\text{SE}}(\mathbf{x}; \mathcal{W}_{\text{SE}}) \\ \mathcal{W}_{\text{SE}} &\leftarrow \arg \min_{\mathcal{W}_{\text{SE}}} \mathcal{E}(\mathbf{y} \parallel \mathbf{s}) \end{aligned} \quad (1)$$

Premixture (Simulation of sampling from $\tilde{\mathbb{S}}_{\text{p-tr}}$)

$$\tilde{\mathbf{s}} = \mathbf{s} + \mathbf{m}; \quad \mathbf{s} \in \mathbb{S}_{\text{p-tr}}, \mathbf{m} \in \mathbb{M}_{\text{tr}} \quad (2)$$

Specialist Pre-Training (Self-Supervised / ZSL)

Pseudo SE

$$\begin{aligned} \tilde{\mathbf{x}} &= \tilde{\mathbf{s}} + \mathbf{n}; \quad \tilde{\mathbf{s}} \in \tilde{\mathbb{S}}_{\text{p-tr}}, \mathbf{n} \in \mathbb{N}_{\text{tr}} \\ \tilde{\mathbf{y}} &= f_{\text{PSE}}(\tilde{\mathbf{x}}; \mathcal{W}_{\text{PSE}}) \\ \mathcal{W}_{\text{PSE}} &\leftarrow \arg \min_{\mathcal{W}_{\text{PSE}}} \mathcal{E}(\tilde{\mathbf{y}} \parallel \tilde{\mathbf{s}}) \end{aligned} \quad (3)$$

Contrastive Mixtures

$$\begin{aligned} \tilde{\mathbf{x}}_1^{\oplus} &= \tilde{\mathbf{s}}^{\oplus} + \mathbf{n}_1; \quad \tilde{\mathbf{s}}^{\oplus} \in \tilde{\mathbb{S}}_{\text{p-tr}}, \mathbf{n}_1, \mathbf{n}_2 \in \mathbb{N}_{\text{tr}} \\ \tilde{\mathbf{x}}_2^{\oplus} &= \tilde{\mathbf{s}}^{\oplus} + \mathbf{n}_2 \end{aligned} \quad (4)$$

$$\begin{aligned} \tilde{\mathbf{x}}_1^{\ominus} &= \tilde{\mathbf{s}}_1^{\ominus} + \mathbf{n}; \quad \tilde{\mathbf{s}}_1^{\ominus}, \tilde{\mathbf{s}}_2^{\ominus} \in \tilde{\mathbb{S}}_{\text{p-tr}}, \mathbf{n} \in \mathbb{N}_{\text{tr}} \\ \tilde{\mathbf{x}}_2^{\ominus} &= \tilde{\mathbf{s}}_2^{\ominus} + \mathbf{n} \end{aligned} \quad (5)$$

$$\begin{aligned} \tilde{\mathbf{y}}_1^{\oplus} &= f_{\text{CM}}(\tilde{\mathbf{x}}_1^{\oplus}; \mathcal{W}_{\text{CM}}) \\ \tilde{\mathbf{y}}_2^{\oplus} &= f_{\text{CM}}(\tilde{\mathbf{x}}_2^{\oplus}; \mathcal{W}_{\text{CM}}) \\ \tilde{\mathbf{y}}_1^{\ominus} &= f_{\text{CM}}(\tilde{\mathbf{x}}_1^{\ominus}; \mathcal{W}_{\text{CM}}) \\ \tilde{\mathbf{y}}_2^{\ominus} &= f_{\text{CM}}(\tilde{\mathbf{x}}_2^{\ominus}; \mathcal{W}_{\text{CM}}) \\ \mathcal{L}_p &= \mathcal{E}(\tilde{\mathbf{s}}^{\oplus} \parallel \tilde{\mathbf{y}}_1^{\oplus}) + \mathcal{E}(\tilde{\mathbf{s}}^{\oplus} \parallel \tilde{\mathbf{y}}_2^{\oplus}) + \lambda_p [\mathcal{E}(\tilde{\mathbf{y}}_1^{\oplus} \parallel \tilde{\mathbf{y}}_2^{\oplus})] \\ \mathcal{L}_n &= \mathcal{E}(\tilde{\mathbf{s}}_1^{\ominus} \parallel \tilde{\mathbf{y}}_1^{\ominus}) + \mathcal{E}(\tilde{\mathbf{s}}_2^{\ominus} \parallel \tilde{\mathbf{y}}_2^{\ominus}) \\ &\quad + \lambda_n [\mathcal{E}(\tilde{\mathbf{s}}_1^{\ominus} \parallel \tilde{\mathbf{s}}_2^{\ominus}) - \mathcal{E}(\tilde{\mathbf{y}}_1^{\ominus} \parallel \tilde{\mathbf{y}}_2^{\ominus})]^2 \\ \mathcal{W}_{\text{CM}} &\leftarrow \arg \min_{\mathcal{W}_{\text{CM}}} \left[\sum_{i=1}^T \mathcal{L}_p(t) + \sum_{i=1}^T \mathcal{L}_n(t) \right] \end{aligned} \quad (6)$$

Specialist Fine-Tuning (Fully-Supervised / FSL)

$$\begin{aligned} \mathbf{x} &= \mathbf{s} + \mathbf{n}; \quad \mathbf{s} \in \mathbb{S}_{\text{f-tr}}, \mathbf{n} \in \mathbb{N}_{\text{tr}} \\ \mathbf{y} &= f(\mathbf{x}; \mathcal{W}) \\ \mathcal{W} &\leftarrow \arg \min_{\mathcal{W}} \mathcal{E}(\mathbf{y} \parallel \mathbf{s}) \end{aligned} \quad (7)$$
