

Kernel Fusion

```
scale<<<grid, block>>>(N, d_z, beta);  
cublasDaxpy(N, 1, d_z, 1, d_n, 1);  
cubladDaxpy(N, -alpha, d_w, 1, d_z, 1);
```

Convert to fused kernel

```
fused_kernel<<<grid, block>>>(N, d_z, d_n, beta, 1, d_w, alpha);
```

Inside
fused
kernel

```
int i = blockDim.x * blockIdx.x + threadIdx.x;  
  
for (int j = i; j < N, j += gridDim.x * blockDim.x)  
{  
    d_z[j] = beta * d_z[j];  
    d_z[j] = d_z[j] + d_n[j];  
    d_w[j] = d_w[j] - alpha*d_z[j];  
}
```
