

ServiceX

TRANSLATE FUNC-ADL

Translate
func_adl or other
event selection
syntax into qastle

GENERATE CODE

Translate qastle
statements into
C++ or python
code.

Result is mount-
ed into transform-
er pods

LOOKUP FILES

DID Finder
submits request
to Rucio to find
file replicas.

Applies logic to
determine most
efficient replica to
access in trans-
formers

PREFLIGHT CHECK

Open a sample
input file to insure
the generated
code is valid and
the selected
properties are
available in the
file.

TRANSFORM FILES

Transformer pods
autoscale up to
rapidly process
files
Results written to
object-store

TRANSFORMED FILES
