

(a) Operator Type	Example	Diagram
One-to-One Operator	Element-wise Operator (E.O., e.g., <i>Relu, Add</i>)	
Many-to-Many Operator	Tensor-wise Operator (T.O., e.g., <i>CONV, FC</i> , Softmax, MaxPool)	
● : Operators, : Activations		

XLA, Halide, TVM, NVIDIA FasterTransformer[4][5], ...

(b)	Element-wise Operator	Tensor-wise Operator
Element-wise Operator	Element-Element Fusion 	Element-Tensor Fusion
Tensor-wise Operator	Tensor-Element Fusion 	(c) Tensor-Tensor Fusion

(c) T-T Fusion	Fused-CNN[8],TGPA[94]	This work
Tensor Operator Property	Activation-Weight High Opt. Int. (<i>CONV, FC</i>)	Activation-Activation Low Opt. Int. (<i>L, A</i>)
Intermediate Operator Type	One-to-One (<i>Relu</i>)	Many-to-Many (<i>Softmax</i>)
Domain (Example)	CNNs (<i>CONV-Relu-CONV</i>)	Transformers (<i>L-softmax-A</i>)
