## **MLCN Submission 32**

### **Changes after review:**

- On page 3, “an Atrophy Estimator and a Biomechanical Network:”. “.” was replaced by “.” ;
- On page 3, added explanation on the use of 27 regions as opposed to the original 138 NeuroMorph Parcellations (reducing computational cost);
- Figure 1 and corresponding caption were modified/expanded for a more clear explanation of training and testing procedures, in order to address comments by Reviewers #3 and #4;
- On page 4, included definitions of  $X$  and  $x$ ;
- Table 1 was modified to include "Mean" and "Standard deviation" indicating their corresponding rows;
- In discussion, added comment on data imbalance and how to address it in future work.
