

① Given parallel texts (x_f, x_e)

$x_f = \alpha \beta \gamma \delta \epsilon \zeta$

$x_e = a b c d e f$

LASER

$x'_e = a c d e k f$

$x'_f = \alpha \beta \gamma \lambda \xi \zeta$

② Mine imperfect translations x'_f & x'_e

③ Learn to **edit** mined text to reconstruct the original & **translate**

EDIT

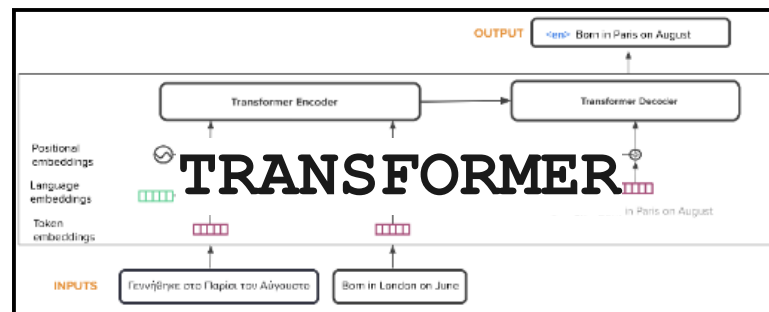

$x_f \oplus x'_e$

$x'_f \oplus x_e$

TRANSLATE

$x_f \oplus \langle \text{MASK} \rangle$

$\langle \text{MASK} \rangle \oplus x_e$

$\langle e \rangle x_e$

$\langle f \rangle x_f$

$\langle e \rangle x_e$

$\langle f \rangle x_f$
