

(a) input object (**top**),
Observed points and
normals (**bottom**)

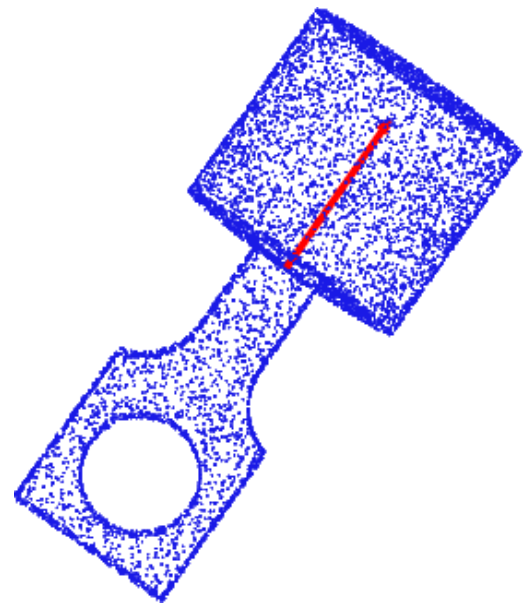

(b) each of the points casts
a vote for all the vectors
in its tangent space.

(c) modes pre- (**top**) and
post- (**bottom**) mean-shift
clustering

(d) vectors corresponding
to modes in pre- (**top**) and
post- (**bottom**) mean-shift

(e) final highest voting
extrusion axis shown
in red
