Filter

$\pi_{\varphi_1}^{(1)}$...	$\pi_{\varphi_d}^{(1)}$
$\pi_{\varphi_1}^{(2)}$...	$\pi_{\varphi_d}^{(2)}$
\vdots	\ddots	\vdots
$\pi_{\varphi_1}^{(B)}$...	$\pi_{\varphi_d}^{(B)}$

Score Matrix

$\pi_{\varphi_i}^{(B)}$: importance score of feature φ_j
 over the B' th bootstrap sample
 dataset.

Aggregated score vector

$[\Pi_{\varphi_1} \dots \Pi_{\varphi_d}]$

Select d' features
 with highest Π_{φ_i}

$$\Pi_{\varphi_i} = \frac{1}{B} \sum_{b=1}^B \pi_{\varphi_i}^{(b)}$$
