

Example	GraphIE	FourIE
<p>In the January attack, two Palestinian <u>suicide</u> bombers <b>blew</b> themselves up in central Tel Aviv, killing 23 other people.</p> <p><b>Explanation:</b> “blew” is correctly predicted by GraphIE as a “Die” event trigger while FourIE incorrectly predicted it as an “Attack” event trigger.</p>		
<p>We pretty much know that <b>Marinello</b>, while on the <u>board</u>, has arranged to get future money from the <b>USCF</b>.</p> <p><b>Explanation:</b> The relation between “Marinello” and “USCF” is correctly predicted by GraphIE as a “ORG-AFF” relation while FourIE incorrectly predicted it as a “GEN-AFF” relation.</p>		
<p>A second <u>rocket</u> landed in farmlands and the <b>other</b> <b>hit</b> a house inside the refugee camp, ...</p> <p><b>Explanation:</b> “other” is correctly predicted by GraphIE as an “Instrument” for the event trigger “hit” while FourIE incorrectly predicted it as an “Attacker” for the event trigger “hit”.</p>
