

Contact force phase and suggested thresholds (bodymodel ISO/TS 15066:2016)

		Phase I $< 0.5 \text{ s}$	Phase II
			
Contact event type	Unconstrained Transient contact (Def. III.9) 	A <i>Transient contact (Def. III. 9):</i> unconstrained human body part ✓ <i>Transient contact (Def. III.11):</i> short duration ✓ Transient threshold? (Fig. 4 p.16) ✓	B <i>Transient contact (Def. III.9):</i> unconstrained human body part ✓ <i>Transient contact (Def. III.11):</i> short duration ✗ Quasi-static threshold? (Fig. 4 p.16) ✗
	Constrained Quasi-static contact (Def. III.8) 	C <i>Quasi-static contact (Def. III.8):</i> constrained human body part ✓ <i>Quasi-static contact (Def. III.10):</i> Extended duration ✗ Quasi-static threshold? (Fig. 4 p.16) ✗	D <i>Quasi-static contact (Def. III. 8):</i> constrained human body part ✓ <i>Quasi-static contact (Def. III.10):</i> Extended duration ✓ Quasi-static threshold? (Fig. 4 p.16) ✓
