

$$\bar{f}_i = \frac{f_i - \mu}{\sigma}$$

An arrow points from this equation to the next bar chart.

class-sensitive features

$$\bar{f}_i = \frac{f_i - \mu}{\sigma} * \textcircled{\text{S}}$$

An arrow points from this equation to the next bar chart.

Gradients of s on class-sensitive locations will have a larger value.

Features will be fast adapted after update.
