

Functional MRI Data Preprocessing		SPM 12	AFNI	FSL	Free Surfer	CONN	fMRI Prep	ANTs	Nilearn		
Brain Extraction		✓	✓	✓	✓		✓	✓	✓		
Remove voxels not necessary for analysis such as bone, dura, air, etc., leaving just the brain											
↓											
Slice-Timing Correction		✓	✓	✓	✓	✓	✓				
Adjust for the fact that each slice in the volume is taken at a different time, not all at once											
↓											
Motion Correction/Realignment		✓	✓	✓	✓	✓	✓	✓			
Correct movement made during scanning by aligning all the functional images with one reference											
↓											
Co-registration		✓	✓	✓	✓	✓	✓	✓			
Align participant’s functional images with the anatomical structural images for localization											
↓											
Normalization		✓	✓	✓	✓	✓	✓				
Wrap the data across subjects to a template/atlas standardized space											
↓											
Smoothing		✓	✓	✓	✓	✓		✓	✓		
Perform weighted averages of individual voxels with neighboring voxels											
Functional Brain Network Construction		Recommended Software: CONN , GraphVar , Brain Connectivity Toolbox									
Brain Region Parcellation										Construct Network	
Segment each subject into the ROI defined by the given atlas	→									Calculate pairwise correlations between ROIs as edges
