

- $x_i$  : The  $i$ -th training sample with label  $y_i$ .
- ◆  $W_{y_i}$  : The target embedding of identity  $y_i$ .
- -  $\theta_{yi}$  : The angle between  $x_i$  and target  $W_{y_i}$ .
- $v_{intra}(\theta_{yi})$  : The scale of intra-class gradient.
- ◆  $W_j$  : Targets of other identities  $j \neq y_i$ .
- -  $\theta_j$  : Angles between  $x_i$  and other targets  $W_j$ .
- $v_{inter}(\theta_j)$  : The scale of inter-class gradient.
