

Cells with chemical, genetic or control perturbations

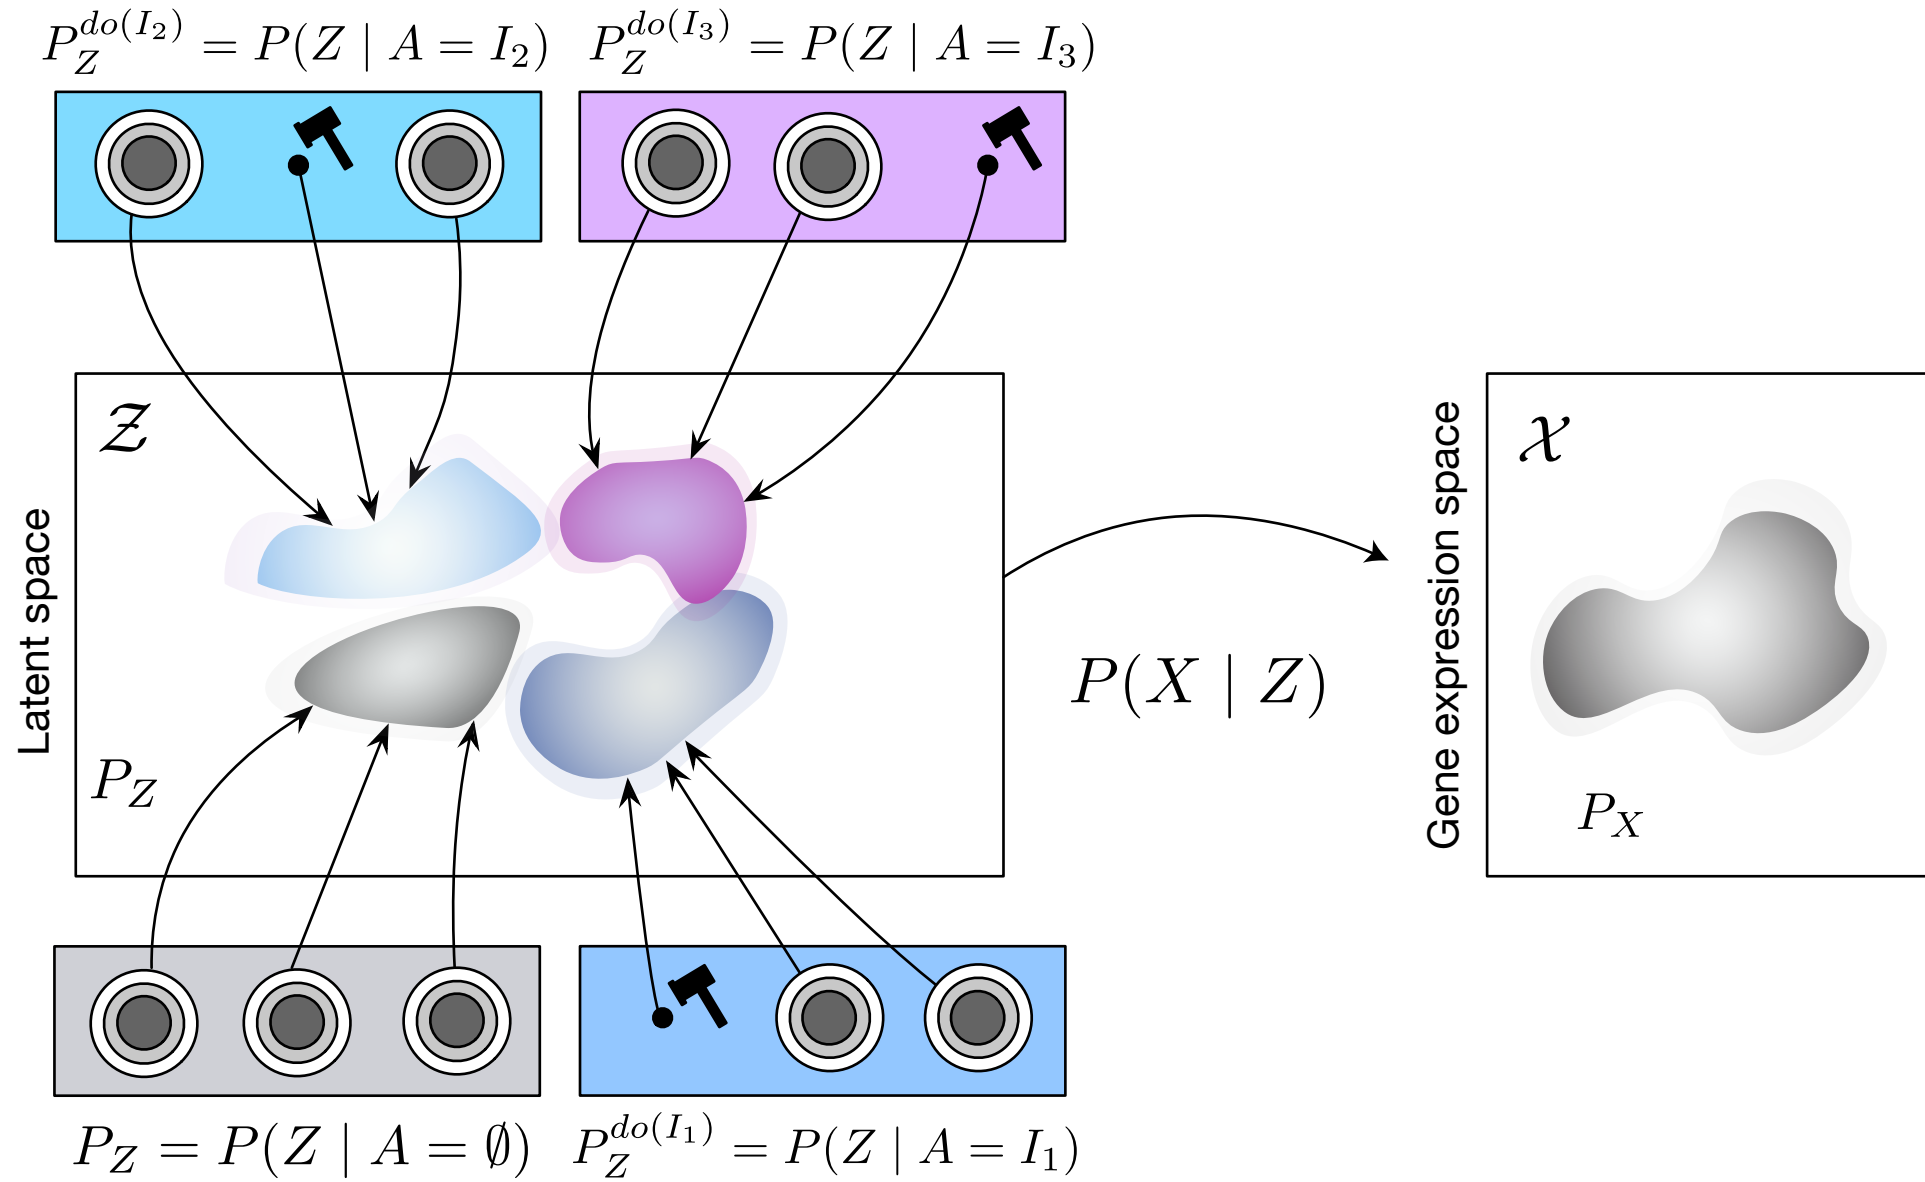

scRNA-seq

Training data set

Sparse Mechanism Shift Variational Auto-Encoder

i. Latent target identification

$$I_1 \rightarrow z_1$$

$$I_2 \rightarrow z_2$$

$$I_3 \rightarrow z_3$$

ii. Disentangled representations of cells

$$z_1 \approx \text{Activity of Biological Process A}$$

$$z_2 \approx \text{Activity of Biological Process B}$$

$$z_3 \approx \text{Activity of Biological Process C}$$

iii. Out of Distribution Generalization
