

## Cells with chemical, genetic or control perturbations

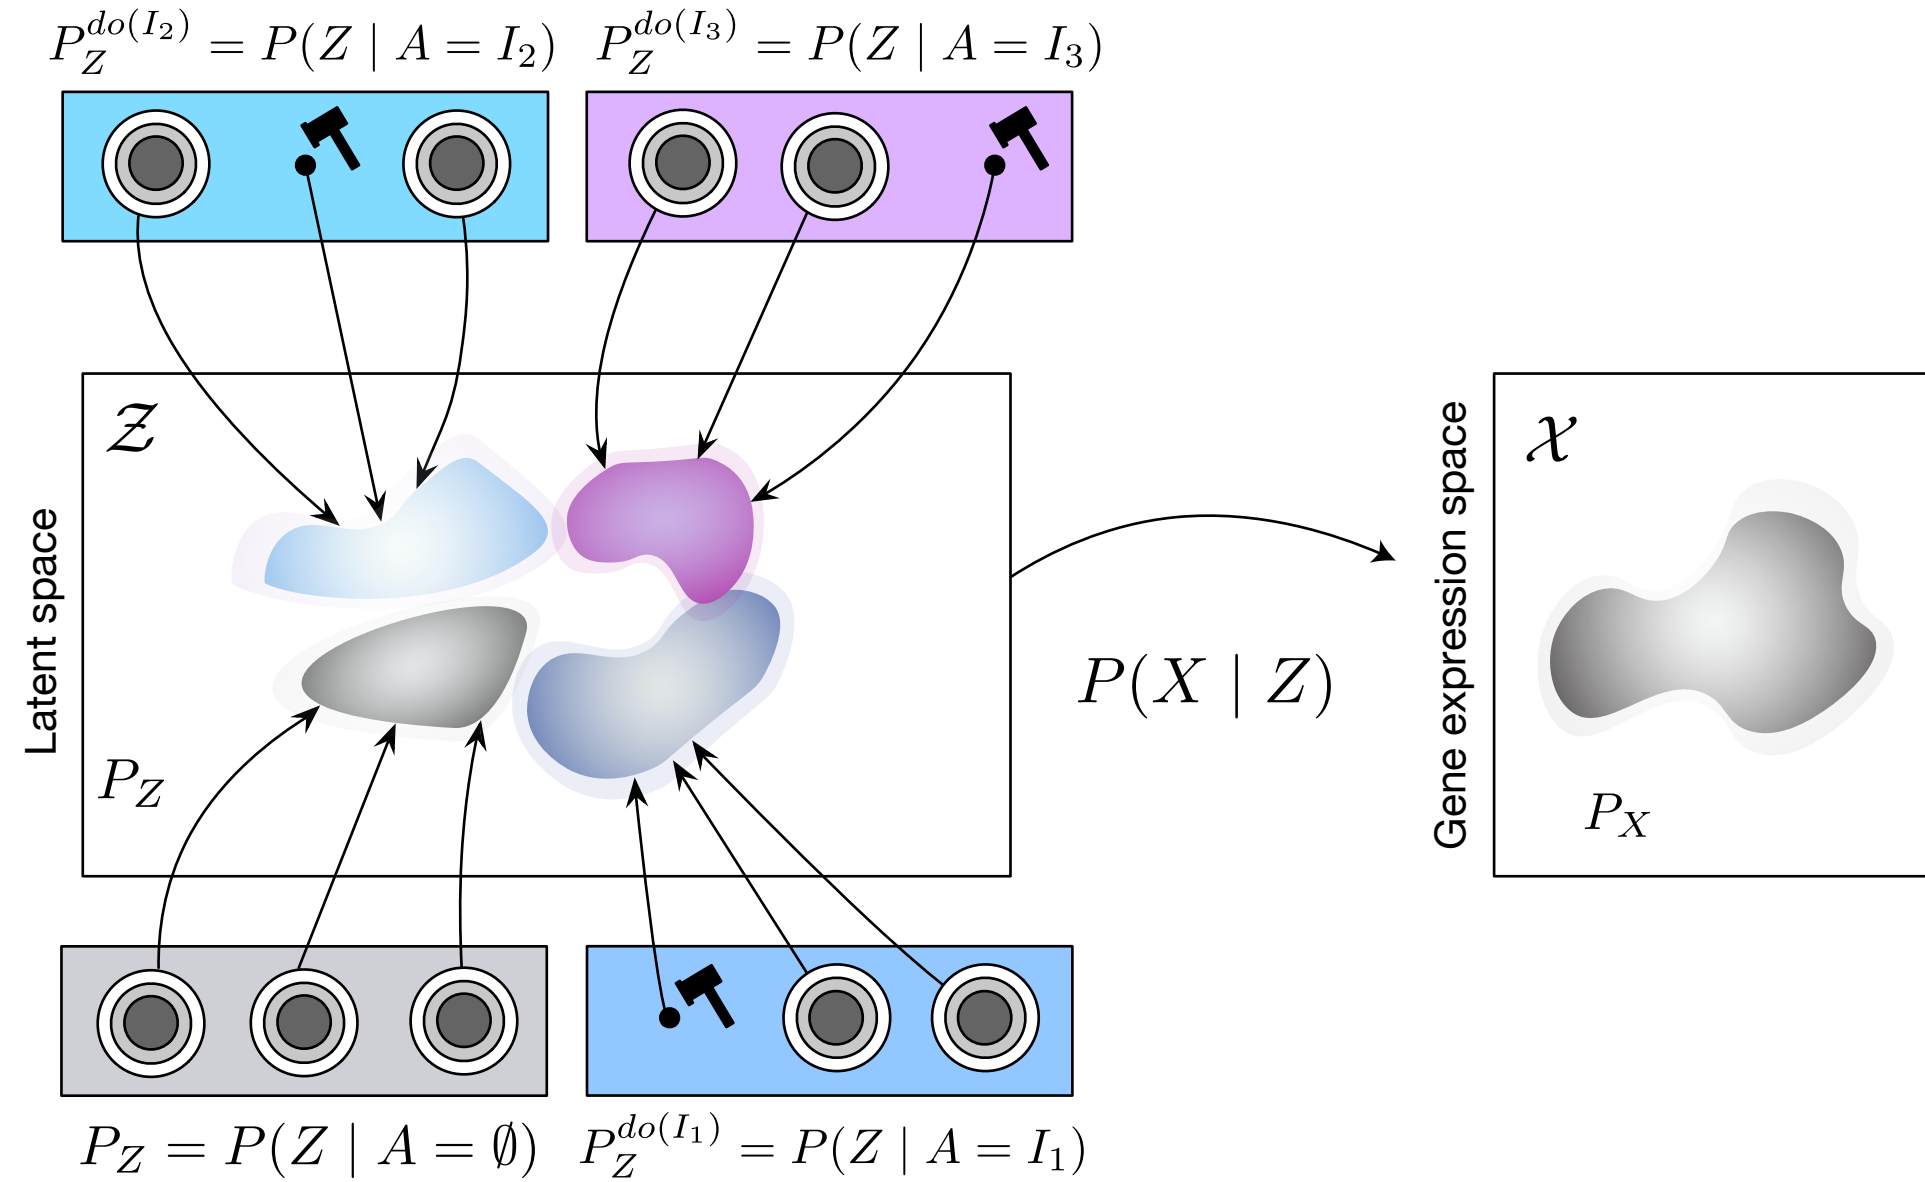

scRNA-seq

**Training data set**

## Sparse Mechanism Shift Variational Auto-Encoder

### 1. Latent target identification

$$I_1 \rightarrow z_1$$

$$I_2 \rightarrow z_2$$

$$I_3 \rightarrow z_3$$

### 2. Disentangled representations of cells

$$z_1 \approx \text{Activity of Biological Process A}$$

$$z_2 \approx \text{Activity of Biological Process B}$$

$$z_3 \approx \text{Activity of Biological Process C}$$

### 3. Out of Distribution Generalization

Algorithm Output

**C.**
