

# Few-Shot Meta-RL

Exploration  
Evaluation

## Multi-Task

### Goal

- Learn new tasks within a few steps/episodes

### Meta-Learning

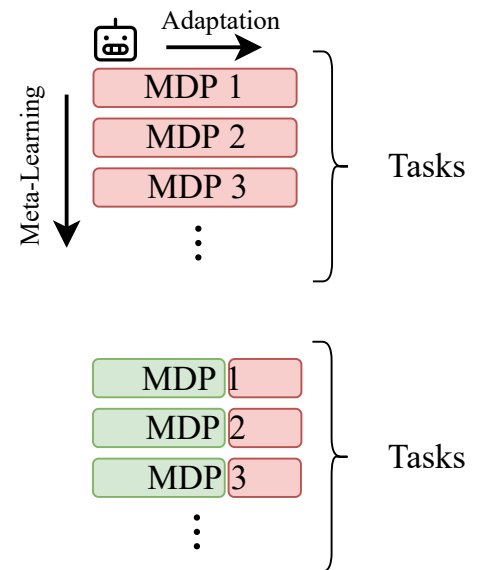

- Over Multiple (similar) tasks

### Zero-Shot

- Perform well from start
- Methods:  $RL^2$ , L2RL, VariBAD

### Few-Shot

- Free exploration phase
- Methods: MAML, DREAM

# Many-Shot Meta-RL

## Multi-Task

### Goal

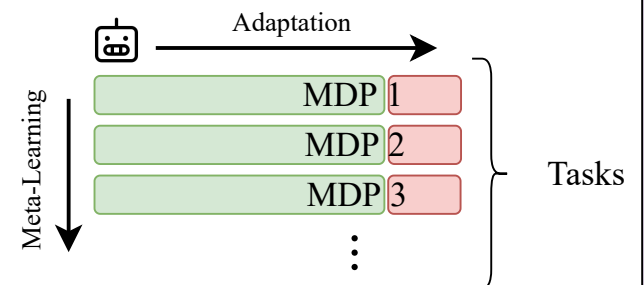

- Learn new tasks better than standard RL algorithms

### Meta-Learning

- Over Multiple (diverse) tasks

### Solutions

- Methods: LPG, MetaGenRL

## Single-Task

### Goal

- Accelerate standard RL algorithms

### Meta-Learning

- Over windows in a single task. (No reset)

### Solutions

- Methods: STACX, FRODO
