

## Input Image

 **ML Model**  
TinyVGG

See [CNN Explainer](#) to learn more about TinyVGG

 **Segmenter**

## Image Segments

16 segments

 **WebSHAP**

For efficiency, compute SHAP values for segments, not individual pixels

## Model Output Predicted likelihoods of four image categories

0.8590

Ladybug

0.0499

Espresso

0.0747

Orange

0.0165

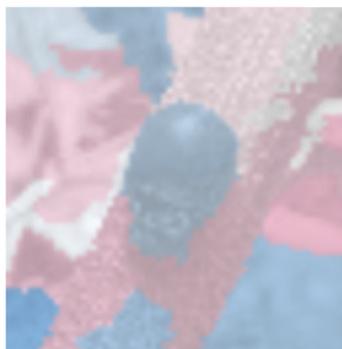

Sports Car

 **WebSHAP**

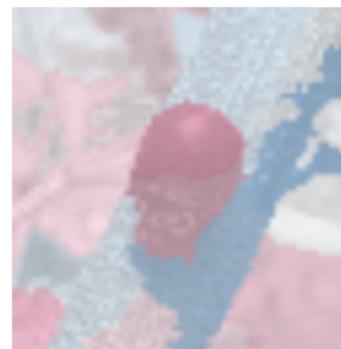

- ✓ Privacy
- ✓ Ubiquity
- ✓ Interactivity

## Model Explanation Each segment's contribution to model's prediction

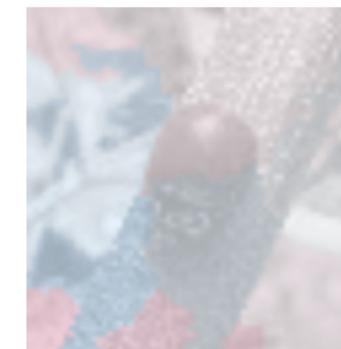

Ladybug

Espresso

Orange

Sports Car
