

Input images  
to separate models

(32, 32, 3)

Convolutional layer  
(Identity mapping sets)

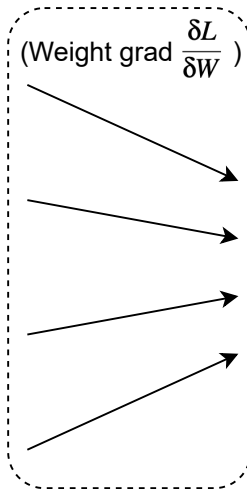

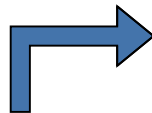

(256 convolutional kernels)

Conv output

(32, 32, 256)

Data used to reconstruct images at server

(32\*32\*256, 256)

FC 1

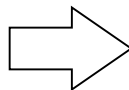

(256 units)

FC 2

(32\*32\*3 units)

All-to-all  
connection

Original model  
architecture
