

(a) Training Stage 1: Blind-Neighborhood Network

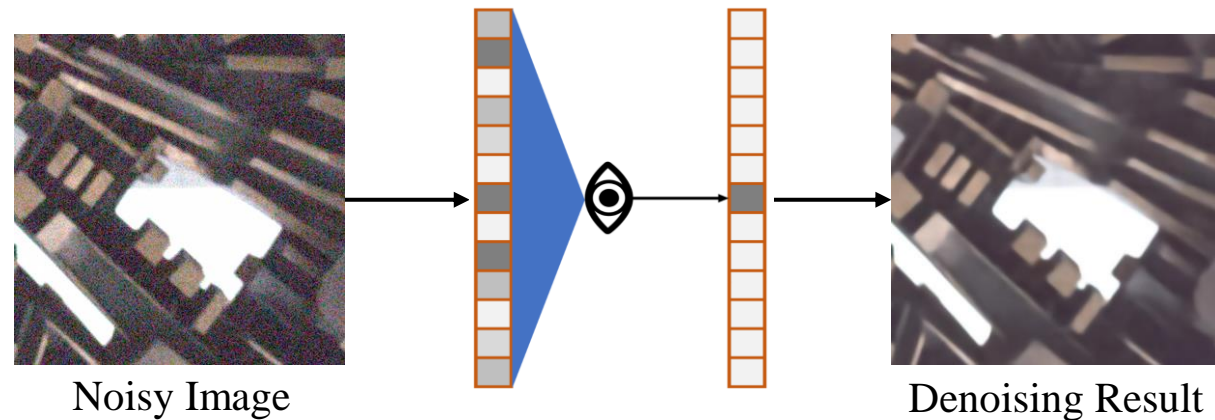

(b) Training Stage 2: Locally Aware Network

$$\mathcal{L}_D = (1 - \alpha) \cdot \|sg(\tilde{\mathbf{x}}_1) - \hat{\mathbf{x}}\|_1 + \alpha \cdot \|sg(\tilde{\mathbf{x}}_2) - \hat{\mathbf{x}}\|_1$$

(c) Training Stage 3: Denoising Network

(d) Inference with the 3rd-Stage Denoising Network
