

(a) Network topology

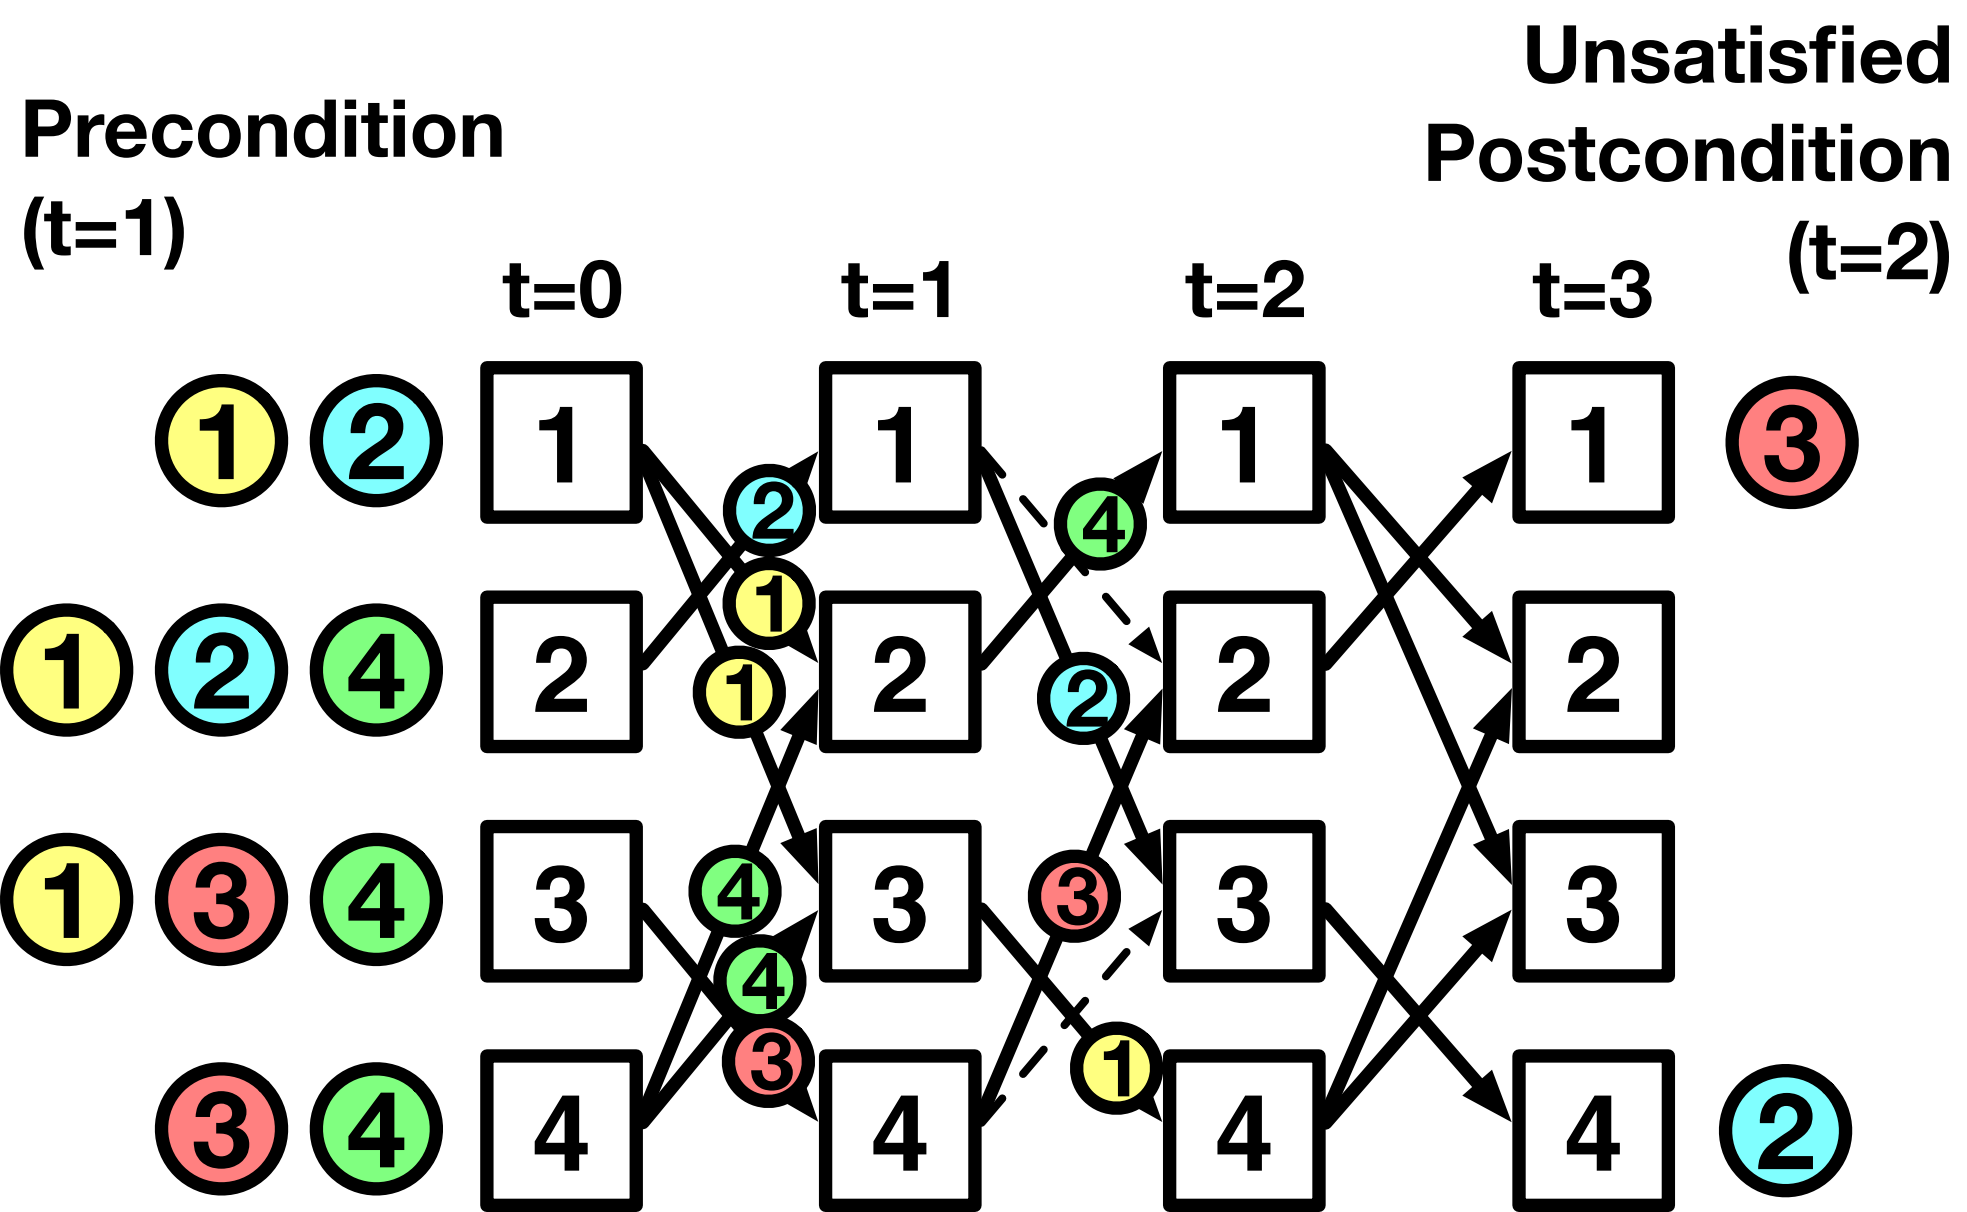

(b) TEN expansion (to  $t=3$ )

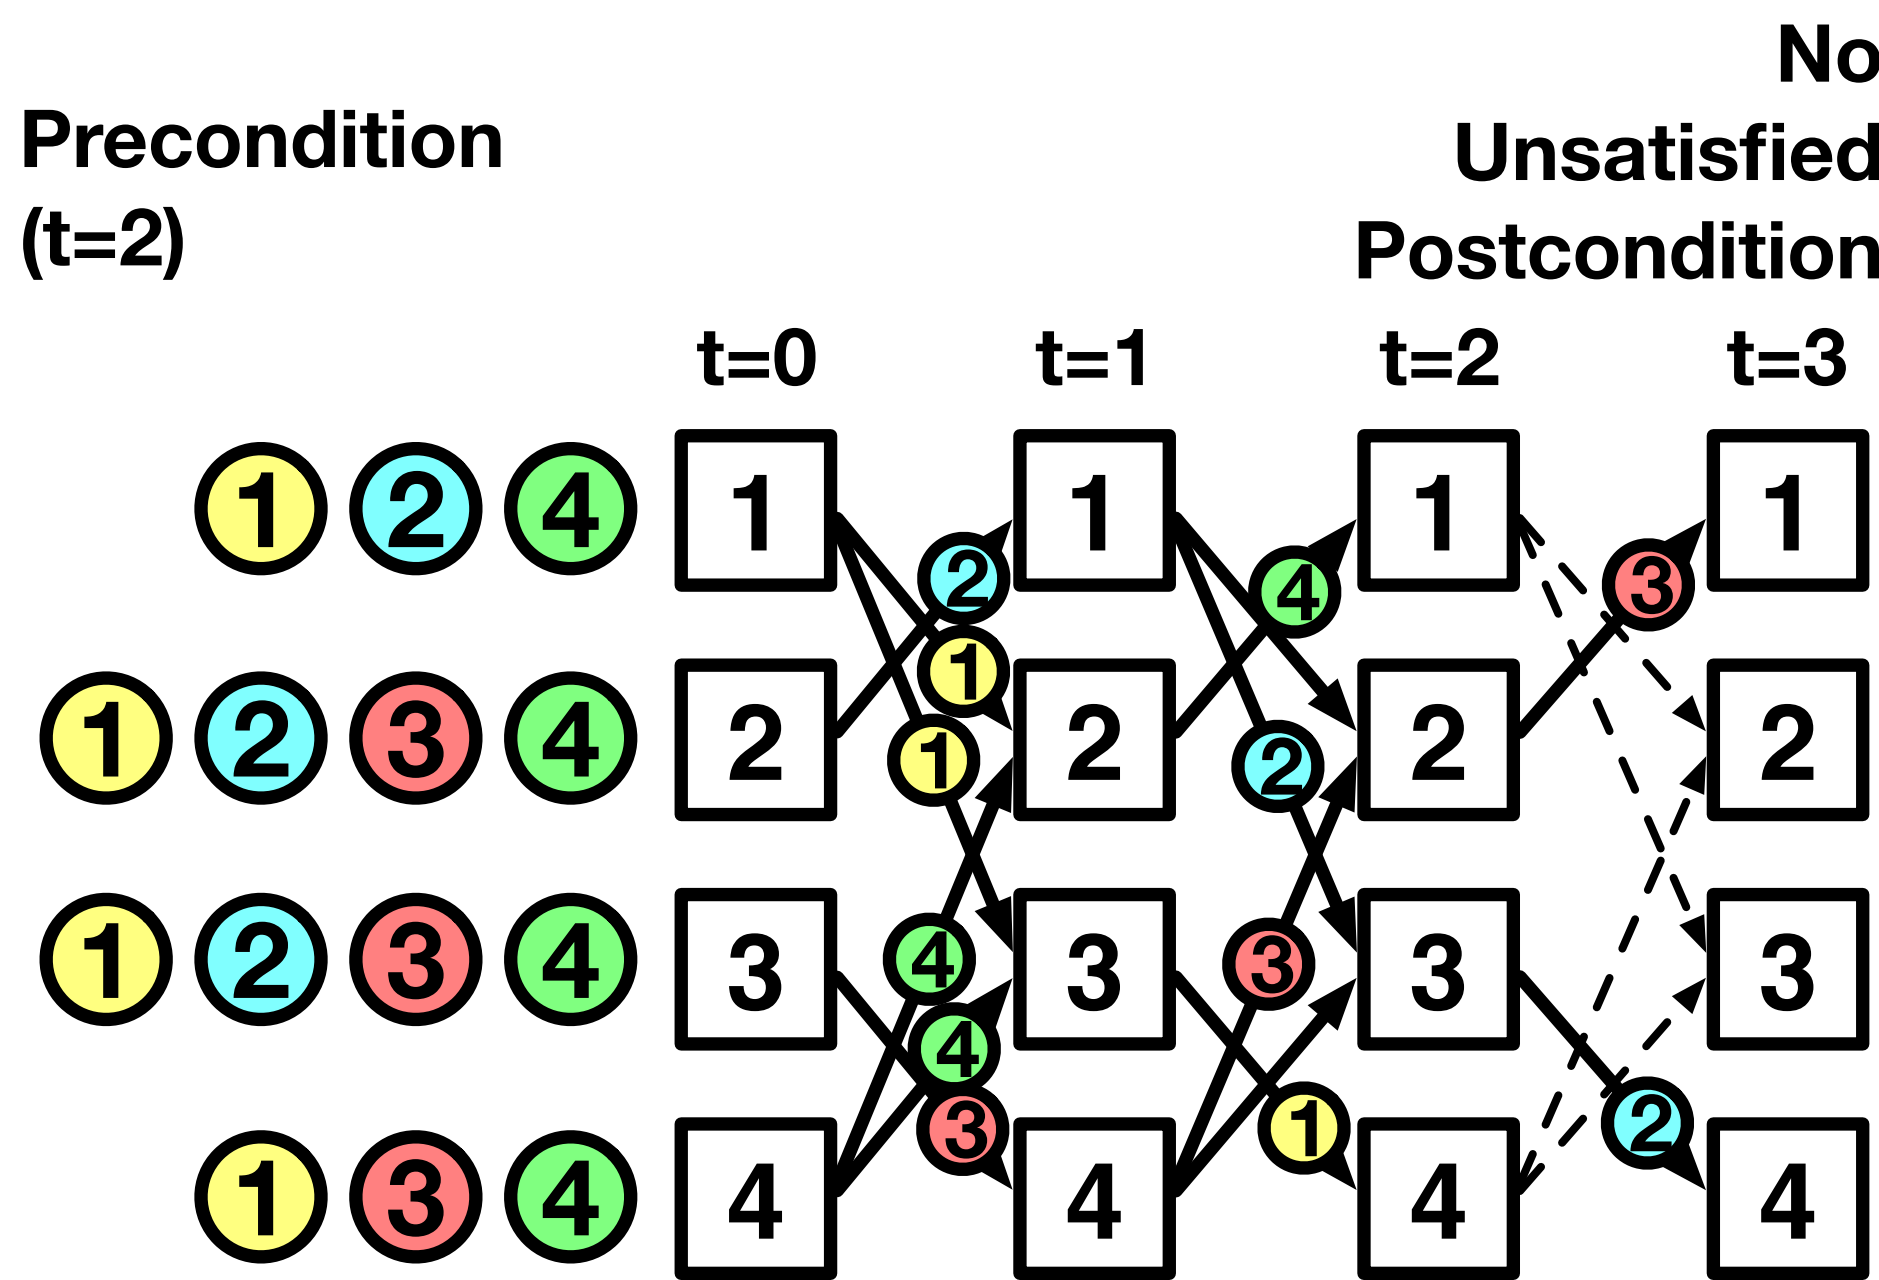

(c) Evaluate initial collective precondition and unsatisfied postcondition

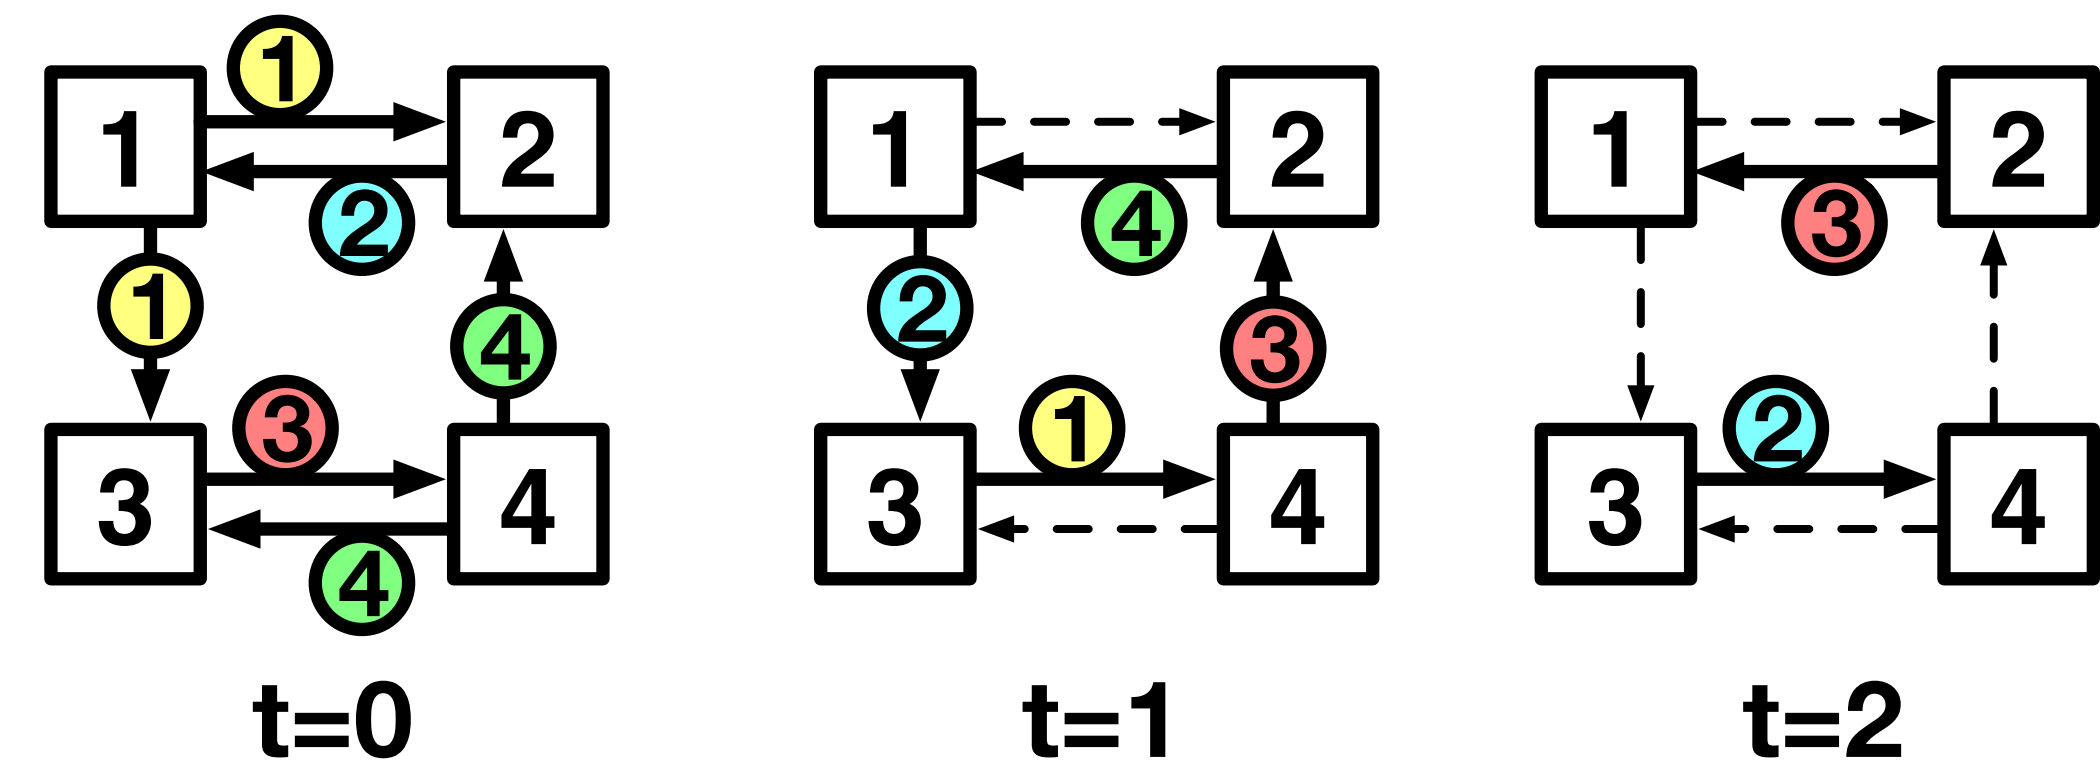

(d) Run Greedy-based matching (at  $t=0$ ) and evaluate unsatisfied postcondition (at  $t=1$ )

(e) Evaluate precondition (at  $t=1$ ), Run Greedy-based matching (at  $t=1$ ), and evaluate unsatisfied postcondition (at  $t=2$ )

(f) Evaluate precondition (at  $t=2$ ) and evaluate unsatisfied postcondition (at  $t=3$ )

(g) Resulting synthesized All-Gather Algorithm
