

## Query

Betty is saving money for a new wallet which costs \$100. Betty has only half of the money she needs. Her parents decided to give her \$15 for that purpose, and her grandparents twice as much as her parents. How much more money does Betty need to buy the wallet?

## Retrieved SP-questions

How much more money does Betty need to buy the \$100 wallet if she only has half the amount? Her parents gave her \$15, and her grandparents gave her twice as much as her parents.

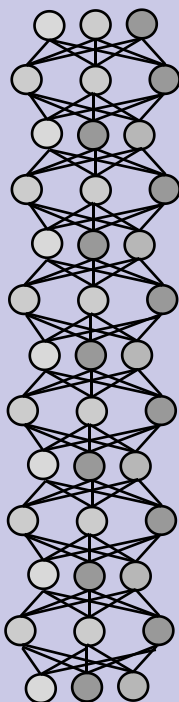

Betty wants to buy a new wallet that costs \$100. She has 50% of the total cost, and her parents gave her \$15. Her grandparents gave her twice as much as her parents. How much more does she need to save?

If Betty has half of the money needed to buy a \$100 wallet, and her parents gave her \$15, while her grandparents gave her twice as much as her parents, how much more does she need to buy the wallet?

Betty has only saved half of the \$100 she needs to buy a new wallet. Her parents gave her \$15, and her grandparents gave her twice as much as her parents. How much more money does she need to purchase the wallet?

## LLM

## Answer before Fed-SP-SC

Betty's parents gave her \$15, and her grandparents gave her \$30. So she has \$45 in total. She needs \$100 for the wallet, so she needs \$55 more.

Answer:\$55

## Historical voting results

Betty has 50% of the cost, which means she has \$50. Then, her parents gave her \$15, so she now has \$65. Her grandparents gave her twice as much as her parents, so they gave her \$30. Therefore, Betty has \$95. The answer is \$5.

Answer:\$55

Betty has \$50 for the wallet (50% of \$100). Her parents gave her \$15, so her grandparents gave her \$30 ( $15 \times 2$ ). Altogether, Betty has \$95 ( $50 + 15 + 30$ ). To reach the cost of the wallet (\$100), she still needs to save \$5.

Answer:\$5

Betty has half of the money needed to buy a \$100 wallet, so she has \$50. Her parents gave her \$15, so she now has \$65. Her grandparents gave her twice as much as her parents, so they gave her \$30. She now has \$95. So she needs \$5 more to buy the wallet.

Answer:\$5

Betty's parents gave her \$15. This means that Betty has \$65 ( $50 + 15$ ) in total. However, Betty needs \$100 to buy the new wallet, which means that she needs \$35 more.

Answer:\$35

## Fed-SP-SC Answer

The answer is \$5
