

Motivation

1. For what purpose was the dataset created? Was there a specific task in mind? Was there a specific gap that needed to be filled? Please provide a description.
Your answer here.
2. What is the speech dataset name, and does the name accurately describe the contents of the dataset?
Your answer here.
3. Who created this dataset (e.g., which team, research group) and on behalf of which entity (e.g., company, institution, organization)?
Your answer here.
4. Who funded the creation of the dataset? If there is an associated grant, please provide the name of the grantor and the grant name and number.
Your answer here.
5. Can the dataset be used to draw conclusions on read speech, spontaneous speech, or both?
Your answer here.
6. Describe the process used to determine which linguistic subpopulations are the focus of the dataset.
Your answer here.
7. Any other comments?
Your answer here.
6. How many hours of speech and number of speakers words are in the dataset (by each type, if appropriate)?
Your answer here.
7. Are there standardized definitions of linguistic subpopulations that are used to categorize the speech data? How are these linguistic subpopulations identified in the dataset and described in the metadata?
Your answer here.
8. For any linguistic subpopulations identified in the dataset, please provide a description of their respective distributions within the dataset.
Your answer here.
9. Is there a label or target associated with each instance? If so, please provide a description.
Your answer here.
10. How much of the speech data have corresponding transcriptions in the dataset?
Your answer here.
11. Does the dataset contain non-speech mediums (e.g. images or video)?
Your answer here.
12. Is any information missing from individual instances? If so, please provide a description, explaining why this information is missing (e.g., because it was unavailable). This does not include intentionally removed information, but might include, e.g., redacted text.
Your answer here.

Composition

1. What do the instances that comprise the dataset represent (e.g., documents, photos, people, countries)? Are there multiple types of instances (e.g., movies, users, and ratings; people and interactions between them; nodes and edges)? Please provide a description.
Your answer here.
2. How many instances are there in total (of each type, if appropriate)?
Your answer here.
3. Does the dataset contain all possible instances or is it a sample (not necessarily random) of instances from a larger set? If the dataset is a sample, then what is the larger set? Is the sample representative of the larger set (e.g., geographic coverage)? If so, please describe how this representativeness was validated/verified. If it is not representative of the larger set, please describe why not (e.g., to cover a more diverse range of instances, because instances were withheld or unavailable).
Your answer here.
4. How many hours of speech were collected in total (of each type, if appropriate), including speech that is not in the dataset? If there was a difference between collected and included, why? E.g., if the speech data are from an interview and the dataset contains only the interviewee's responses, how many hours of speech were collected in interviews from both interviewer and interviewee?
Your answer here.
5. What data does each instance consist of? "Raw" data (e.g., unprocessed text or images) or features? In either case, please provide a description.
Your answer here.
13. Are relationships between individual instances made explicit (e.g., users' movie ratings, social network links)? If so, please describe how these relationships are made explicit.
Your answer here.
14. Do speakers code switch or speak multiple languages, and if so, how is this identified in the data?
Your answer here.
15. Does the speech dataset focus on a specific topic or set of topics?
Your answer here.
16. Are there recommended data splits (e.g., training, development/validation, testing)? If so, please provide a description of these splits, explaining the rationale behind them.
Your answer here.
17. Does the dataset include sensitive content that can induce different emotions (e.g., anger, sadness) that can cause the speakers to produce unusual pitch or tone deviating from plain speech?
Your answer here.
18. Does the dataset contain content that complies to the users' needs, or does it result in symbolic violence (the imposition of religious values, political values, cultural values etc.)?
Your answer here.
19. Are there any errors, sources of noise, or redundancies in the dataset? If so, please provide a description.
Your answer here.

20. Is the dataset self-contained, or does it link to or otherwise rely on external resources (e.g., websites, tweets, other datasets)? If it links to or relies on external resources, a) are there guarantees that they will exist, and remain constant, over time; b) are there official archival versions of the complete dataset (i.e., including the external resources as they existed at the time the dataset was created); c) are there any restrictions (e.g., licenses, fees) associated with any of the external resources that might apply to a future user? Please provide descriptions of all external resources and any restrictions associated with them, as well as links or other access points, as appropriate.
Your answer here.
21. Does the dataset contain data that might be considered confidential (e.g., data that is protected by legal privilege or by doctor-patient confidentiality, data that includes the content of individuals non-public communications)? If so, please provide a description.
Your answer here.
22. Does the dataset contain data that, if viewed directly, might be offensive, insulting, threatening, or might otherwise cause anxiety? If so, please describe why.
Your answer here.
23. Does the dataset relate to people? If not, you may skip the remaining questions in this section.
Your answer here.
24. Does the dataset identify any subpopulations (e.g., by age, gender)? If so, please describe how these subpopulations are identified and provide a description of their respective distributions within the dataset.
Your answer here.
25. Is it possible to identify individuals (i.e., one or more natural persons), either directly or indirectly (i.e., in combination with other data) from the dataset? If so, please describe how.
Your answer here.
26. Does the dataset contain data that might be considered sensitive in any way (e.g., data that reveals racial or ethnic origins, sexual orientations, religious beliefs, political opinions or union memberships, or locations; financial or health data; biometric or genetic data; forms of government identification, such as social security numbers; criminal history)? If so, please provide a description.
Your answer here.
27. Any other comments?
Your answer here.
3. What mechanisms or procedures were used to collect the speech data, e.g.: is the data a new recording of read speech or an interview? Or is it down-loaded speech data from public speeches, lectures, YouTube videos or movies, etc.?
Your answer here.
4. Were all the data collected using the same technical methodology or setting, including the recording environment (e.g., lab, microphone) and recording information (e.g., sampling rate, number of channels)?
Your answer here.
5. If the dataset is a sample from a larger set, what was the sampling strategy (e.g., deterministic, probabilistic with specific sampling probabilities)?
Your answer here.
6. Is there presence of background noise?
Your answer here.
7. Who was involved in the data collection process (e.g., students, crowdworkers, contractors) and how were they compensated (e.g., how much were crowdworkers paid)?
Your answer here.
8. Over what timeframe was the data collected? Does this timeframe match the creation timeframe of the data associated with the instances (e.g., recent crawl of old news articles)? If not, please describe the timeframe in which the data associated with the instances was created.
Your answer here.
9. Were any ethical review processes conducted (e.g., by an institutional review board)? If so, please provide a description of these review processes, including the outcomes, as well as a link or other access point to any supporting documentation.
Your answer here.
10. Does the dataset relate to people? If not, you may skip the remaining questions in this section.
Your answer here.
11. Did you collect the data from the individuals in question directly, or obtain it via third parties or other sources (e.g., websites)?
Your answer here.
12. For interviewer/interviewee speech data: during the interview process, did interviewers consistently ask questions that are “fair and neutral”?
Your answer here.

Collection Practice

1. How was the data associated with each instance acquired? Was the data directly observable (e.g., raw text, movie ratings), reported by subjects (e.g., survey responses), or indirectly inferred/derived from other data (e.g., part-of-speech tags, model-based guesses for age or language)? If data was reported by subjects or indirectly inferred/derived from other data, was the data validated/verified? If so, please describe how.
Your answer here.
2. What mechanisms or procedures were used to collect the data (e.g., hardware apparatus or sensor, manual human curation, software program, software API)? How were these mechanisms or procedures validated?
Your answer here.
13. Were the individuals in question notified about the data collection? If so, please describe (or show with screenshots or other information) how notice was provided, and provide a link or other access point to, or otherwise reproduce, the exact language of the notification itself.
Your answer here.
14. Did the individuals in question consent to the collection and use of their data? If so, please describe (or show with screenshots or other information) how consent was requested and provided, and provide a link or other access point to, or otherwise reproduce, the exact language to which the individuals consented.
Your answer here.

15. Have data subjects consented to the disclosure of the metadata in the dataset? Also, does the metadata include sensitive personal information such as disability status?
Your answer here.

16. If consent was obtained, were the consenting individuals provided with a mechanism to revoke their consent in the future or for certain uses? If so, please provide a description, as well as a link or other access point to the mechanism (if appropriate).
Your answer here.

17. Has an analysis of the potential impact of the dataset and its use on data subjects (e.g., a data protection impact analysis) been conducted? If so, please provide a description of this analysis, including the outcomes, as well as a link or other access point to any supporting documentation.
Your answer here.

18. Any other comments?

Preprocessing / cleaning / labeling

1. Was any preprocessing/cleaning/labeling of the data done (e.g., discretization or bucketing, tokenization, part-of-speech tagging, SIFT feature extraction, removal of instances, processing of missing values)?
Your answer here.
2. When generating the dataset, was any background noise deleted or adjusted to make all recording qualities similar?
Your answer here.
3. Was the “raw” data saved in addition to the preprocessed / cleaned / labeled data (e.g., to support unanticipated future uses)? If so, please provide a link or other access point to the “raw” data.
Your answer here.
4. Is the software used to preprocess / clean/ label the instances available? If so, please provide a link or other access point.
Your answer here.
5. Did the data collectors hire human annotators to transcribe the data? If so, how trained were the annotators in speech transcription for this context? How familiar were they with the corpus material, the vocabulary used, and the linguistic characteristics of different dialects and accents?
Your answer here.
6. If multiple transcription methods were used, how consistent were the annotators? How were transcripts validated?
Your answer here.
7. If the speech data include transcriptions, what software was used to generate the transcriptions (including, e.g., software used by human transcribers)? Are timestamps included in transcriptions? Are the alignments provided with the transcripts?
Your answer here.
8. Were transcription conventions (such as tagging scheme, treatment of hate speech or swear words, etc.) disclosed along with the corpus?
Your answer here.
9. Is additional coding performed, separate to transcriptions and tagging?
Your answer here.

10. Any other comments?
Your answer here.

Uses

1. Has the dataset been used for any tasks already? If so, please provide a description.
Your answer here.
2. Is there a repository that links to any or all papers or systems that use the dataset? If so, please provide a link or other access point.
Your answer here.
3. Is there any part of this dataset that is privately held but can be requested for research purposes?
Your answer here.
4. What (other) tasks could the dataset be used for?
Your answer here.
5. Is there anything about the composition of the dataset or the way it was collected and preprocessed / cleaned / labeled that might impact future uses? For example, is there anything that a future user might need to know to avoid uses that could result in unfair treatment of individuals or groups (e.g., stereotyping, quality of service issues) or other undesirable harms (e.g., financial harms, legal risks) If so, please provide a description. Is there anything a future user could do to mitigate these undesirable harms?
Your answer here.
6. Are there tasks for which the dataset should not be used? If so, please provide a description.
Your answer here.
7. Any other comments?
Your answer here.

Distribution

1. Will the dataset be distributed to third parties outside of the entity (e.g., company, institution, organization) on behalf of which the dataset was created? If so, please provide a description.
Your answer here.
2. How will the dataset will be distributed (e.g., tarball on website, API, GitHub) Does the dataset have a digital object identifier (DOI)?
Your answer here.
3. Is there a sample dataset distributed? If so, how well does the sample represent the actual dataset? Do they include all forms of speech included in the dataset? How big is the sample?
Your answer here.
4. When will the dataset be distributed?
Your answer here.
5. Will the dataset be distributed under a copyright or other intellectual property (IP) license, and/or under applicable terms of use (ToU)? If so, please describe this license and/or ToU, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms or ToU, as well as any fees associated with these restrictions.
Your answer here.

6. **Have any third parties imposed IP-based or other restrictions on the data associated with the instances?**
If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms, as well as any fees associated with these restrictions.
Your answer here.
7. **Do any export controls or other regulatory restrictions apply to the dataset or to individual instances?**
If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any supporting documentation.
Your answer here.
8. **Any other comments?**
Your answer here.
10. **Any other comments?**
Your answer here.

Maintenance

1. **Who will be supporting / hosting / maintaining the dataset?**
Your answer here.
2. **How can the owner / curator / manager of the dataset be contacted (e.g., email address)?**
Your answer here.
3. **Is there an erratum? If so, please provide a link or other access point.**
Your answer here.
4. **Will the dataset be updated (e.g., to correct labeling errors, add new instances, delete instances)? If so, please describe how often, by whom, and how updates will be communicated to users (e.g., mailing list, GitHub)?**
Your answer here.
5. **If the dataset relates to people, are there applicable limits on the retention of the data associated with the instances (e.g., were individuals in question told that their data would be retained for a fixed period of time and then deleted)? If so, please describe these limits and explain how they will be enforced.**
Your answer here.
6. **How are redactions performed on the dataset? Are personally identifiable information or sensitive information removed from only transcripts, audio censored from the speech data, or both?**
Your answer here.
7. **Will older versions of the dataset continue to be supported / hosted / maintained? If so, please describe how. If not, please describe how its obsolescence will be communicated to users.**
Your answer here.
8. **If others want to extend / augment / build on/ contribute to the dataset, is there a mechanism for them to do so? If so, please provide a description. Will these contributions be validated/verified? If so, please describe how. If not, why not? Is there a process for communicating/distributing these contributions to other users? If so, please provide a description.**
Your answer here.
9. **Aside from this data sheet, is other documentation available about the data collection process (e.g., agreements signed with data subjects and research methodology)?**
Your answer here.
