

Task: You have to make each cluster/group look uniform in some way. For example, if you have a few books, you can group the books by topic (novels, sports, fiction) or color (red, blue, green, yellow) of the cover page.

Please rearrange the statements in the following clusters such that each group looks similar in some way, and try to come up with some name that defines each cluster. For example: if a cluster has two elements (“**India is a land of diversity**”, “**United States offers a diverse options to survive**”), then you can name this cluster as “**Locations offering diversity**”

Now please rearrange the clusters in some way such that each cluster looks uniform and you can easily come up with a name:

Cluster 1:

I went to Himalayas for hiking

Hawaaii has great eateries where you will find amazing seafood

You should stop consuming alcohol, as it might lead to cancer very soon

Cluster 2:

Coffee and tea are good for health

Restaurants in France offer delicious food

Cluster 3:

Going for adventure sports makes me feel alive

I love adventurous experiences

Drinking healthy beverages can make you feel better after a long tiring day
