Which NER tool are you interested in?

en-core-webmd

Which Question Generation tool are you interested in?

T5

Which Question Generation tool are you interested in?

SentenceBERT

Which Question Generation tool are you interested in?

ChatGPT

How many clusters do you want to generate?

10

0

20

In this view, you should first choose some documents from which you want to extract relevant information. Then in the left hand side panel, you should select what kind of named entities would be of potential interest to you, then the factoid question generation model, question embedding algorithm and clustering algorithm. Also use the slider to choose your desired number of clusters.

Select	DocumentID	Content
<input type="checkbox"/>	1	heparin-induced thrombocytopenia and thrombosis and other side effects of hepar
<input checked="" type="checkbox"/>	101	Upon nicotine pre-exposure, brain acetylcholinesterase increased, while monoamin
<input type="checkbox"/>	201	Caution should be used when EVISTA is coadministered with other highly protein-bo
<input type="checkbox"/>	301	Cyclooxygenase-1 (COX-1) inhibitors (flurbiprofen, ketoprofen and ketolack) attenu.
<input type="checkbox"/>	401	In addition, phenoxybenzamine showed little or no calcium-dependent binding to tl
<input checked="" type="checkbox"/>	501	Salicylate competes with a number of drugs for protein binding sites, notably penici
<input type="checkbox"/>	601	Administration of low, but not high, doses of oral nicotine in DSS-treated mice result
<input type="checkbox"/>	701	dobutamine and exercise induced myocardial ischaemia . objective : to determine w
<input type="checkbox"/>	801	vasovagal syncope and severe bradycardia following intranasal dexmedetomidine fo
<input type="checkbox"/>	901	left ventricular dysfunction occurs in patients with coronary artery disease after botl

Your selected Documents:

	DocumentID	Content
1	101	Upon nicc
5	501	Salicylate

=====

We ran the UnsupervisedIE pipeline on your selected documents using NER en-core-webmd and Question Generator as T5 , embedded the questions using SentenceBERT and grouping them into 10 clusters using ChatGPT .You can now visit the Explorer View to see the generated clusters!
