

(a) k -nearest neighbors
in space
($k=4$)

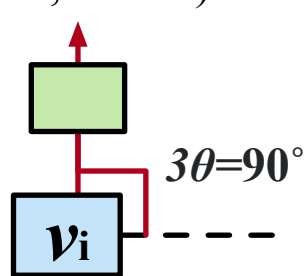

(b) k -nearest neighbors
at one angle α
($k=2$; $\alpha=60^\circ$)

(i)

(ii)

(iii)

(c) k -nearest neighbors at multiple angles ($k=1$; $\theta=30^\circ$)
(Similar graphs are constructed for 120° , 150° , ... 360° ,
but skipped due to space limitation)
