

(T3) Supervised fine-tuning (SFT)

NL: Nothing that breathes is paper.

FOL: $\forall x \text{ (Breathe } (x) \rightarrow \neg \text{ Paper } (x))$

Perturbed FOL: $\forall x \text{ (}\neg \text{ Breathe } (x) \vee \text{ Paper } (x))$

Reverse steps:

1. Change the \vee into \rightarrow
2. Add negation to the Paper
3. Remove negation from the Breathe

(T4) RLHF for Chain-of-Thought Correction
