

Chain-of-Thought Prompting

Q: Concatenate the last letters of the given words: “weapon, reasonable, thin, loyalty”.
A: Let’s think step by step.

Language
Model

1. The last letter of “weapon” is “n” .
 2. The last letter of “reasonable” is "e".
 3. The last letter of “thin” is “n”.
 4. The last letter of “loyalty” is “y”.
 5. Concatenating these letters together, we get "ney".
- Therefore, the answer is “ ney”. ❌

Code Prompting

Generate python code to concatenate the last letters of the given words.

Language
Model

Here's the Python code to concatenate the last letters of the given words:

```
words = ["apple", "banana", "cherry", "date",  
"elderberry"]  
result = ""  
for word in words:  
    result += word[-1]  
print(result)
```

Stage 1

Stage 2

Generate python code to concatenate the last letters of the given words.

Here's the Python code to concatenate the last letters of the given words:

```
words = ["apple", "banana", "cherry",  
"date", "elderberry"]  
for word in words:  
    result += word[-1]  
print(result)
```

Q: “weapon, reasonable, thin, loyalty”
A:

Let’s think step by step. Print all the intermediate variables.

Language
Model

```
words = ["weapon", "reasonable", "thin", "loyalty"]  
result = ""  
for word in words:  
    last_letter = word[-1]  
    result += last_letter  
    print(f"Word: {word}, Last Letter: {last_letter},  
Result: {result}")  
print(result)
```

Output:
...

Word: weapon, Last Letter: n, Result: n
Word: reasonable, Last Letter: e, Result: ne
Word: thin, Last Letter: n, Result: nen
Word: loyalty, Last Letter: y, Result: neny
...

Therefore, the answer is “neny”. ✅
