

# Task 1 (Grouping) Prompt

## System Role (Natural Language Instructions)

You are currently competing in Round 3: Connecting Wall on the quiz show Only Connect. Your task: given 16 "clues" (words or phrases), solve the wall by grouping the clues into four groups of four. You will be given the clues as a list. You are also given examples of solved walls, which include the connections. Provide your answer as a list of four groups of four clues; separate groups by newlines and clues by commas. Do not try to guess the connection; only use the clues given and don't make up your own.

*Be careful! Connecting Wall is deliberately difficult. The puzzles are designed to include red herrings and to suggest more connections than actually exist. Some clues appear to fit into more than one category. Still, there is only one perfect solution for each wall.*

## User Role (In-context examples + input)

### Example 1

Agnew, Blofeld, Boycott, Johnston. **Connection:** Test Match Special regulars  
Knees, Bike, Last legs, Marks. **Connection:** On your \_ \_ \_  
Banshees, Tory, Brock, Galore. **Connection:** Words originating from Irish

# Task 2 (Connections) Prompt

## System Role (Natural Language Instructions)

You are currently competing in Round 3: Connecting Wall on the quiz show Only Connect. Your task: given 4 groups of 4 "clues" (words or phrases), determine the connection for each group. You will be given the groups as four lists of four. You are also given examples of solved walls, which include the connections. Provide your answer by repeating the four groups and adding it after "Connection:"

*Note: Connections might be thematic, linguistic, factual, mathematical and rely on both arcane subject areas and popular culture.*

## User Role (In-context examples + input)

### Example 1

Newel, Bannister, Tread, Riser. **Connection:** Parts of a staircase  
Jaffa, Eccles, "Banbury, Chorley. **Connection:** \_ \_ \_ cake  
Forsyth, Edmonds, Holmes, Parsons. **Connection:** Quiz show hosts
