

Application Types

Machine Learning (ML)

High Performance Computing (HPC)

Serverless Computing

Batch Jobs

Classification

Model training task orchestration

Model inference task orchestration

Added functionalities to HPC workload managers

Connector between cloud and HPC

Cohabitation

Meta-orchestration

Centralized scheduling

Distributed scheduling

Sophisticated heuristics

Meta-heuristic algorithms

Reinforcement learning

Optimal objective

Latency

Completion time

Makespan

Resource utilization

Inference

Throughput

Scalability

Job duration

SLO
