

Original subroutine

```
for i in 0 .. n - 2 {  
  H(qs[i]);  
  for j in i + 1 .. n - 1 {  
    let k = j - i + 1;  
    CRk(qs[j], k, qs[i]);  
  }  
}
```

GM

```
for i in 0 .. n - 2 {  
  H(qs[i]);  
  X(qs[i]);  
  for j in i + 1 .. n - 1 {  
    let k = j - i + 1;  
    CRk(qs[j], k, qs[i]);  
  }  
}
```

Add an X gate

SM

```
for i in 0 .. n - 2 {  
  H(qs[i]);  
  for j in i + 1 .. n - 1 {  
    let k = j - i + 1;  
    //CRk(qs[j], k, qs[i]);  
  }  
}
```

Remove a subroutine calling

CM

```
for i in 0 .. n - 2 {  
  H(qs[i]);  
  for j in i + 1 .. n - 1 {  
    let k = j - i;  
    CRk(qs[j], k, qs[i]);  
  }  
}
```

Modify a classical expression

MM

```
for i in 0 .. n - 2 {  
  H(qs[i]);  
  for j in i + 1 .. n - 1 {  
    let k = j - i + 1;  
    CRk(qs[j], k, qs[i]);  
  }  
  let m = M(qs[i]);  
}
```

Add a measurement statement
