

You need to watch the video, then, you need to answer a question about it

Checkbox - "seen in the past" - Please do not use it if the reason to check it is that you have seen it in previous tasks. You need to check it only if you remember the whole scene from the past, and that is why you knew the answer.

The question - "Is it impossible to answer the question using the given video?" - answer "yes" only if you can't answer the question based on the specific video. If you are randomly guessing the answer / using an educated guess (not based on the video) - answer "yes".
