

Number	Item Content	Expert Opinion	Adoption	Modify	Item after Modification
1.0	Medical Interviewing Skill			Reserve	Medical Interviewing Skill
1.1	Focusing on the patient's main complaint, make accurate inquiries about the condition, including the cause of the disease, the nature, degree, time and regularity of symptoms, aggravating or alleviating factors, accompanying symptoms, diagnosis and treatment, and other medical history such as past history, personal history, allergy history, etc.		Modify relevant content according to item 1.2	Revise	Focus on the patient's chief complaint, and accurately conduct relevant inquiries around the current medical history, including the cause of the onset, the nature, degree, time and regularity of symptoms, aggravating or mitigating factors, accompanying symptoms, diagnosis and treatment, etc.
1.2	Ask the patient with open-ended questions, encouraging the patient to speak up as appropriate	Amended to "Adopt open-ended questions and encourage patients to provide more detailed information"	Move to item 1.3	Revise	Use open-ended questions to encourage patients to provide more detailed information
1.3	Guide patients to provide correct and sufficient disease-related information	This entry contradicts 1.2 and duplicates 1.1	Adopted, adjusted to number 1.2, and modified relevant content according to item 1.1	Revise	Guide patients to provide correct and sufficient disease-related information, including other medical histories such as past history, personal history, allergy history, etc.
1.4	Use plain language and avoid difficult medical terms such as tenesmus, epistaxis, etc.	Amend it to "The language of the question is easy to understand and avoid overly complicated medical terminology"	Adopt	Revise	The questioning language should be easy to understand, and avoid using medical terminology that is too complicated or difficult to understand, such as tenesmus, epistaxis, etc.
1.5	Explain to the patient the rationale or purpose of returning to the visit, treatment	Amended to "Explain to the patient the basis or purpose of the medical terminology, diagnosis, treatment and other related content in the answer"	Adopt	Revise	Explain to the patient the basis or purpose of the medical terminology, diagnosis, treatment, etc. in the answer
1.6	Avoid providing medically harmful information to patients, such as unsubstantiated health information, etc.	Amended to read "such as medical information not confirmed by scientific research"	Adopt	Revise	Avoid providing medically harmful information to patients, such as healthcare information that has not been substantiated by scientific research, etc.
1.7	Make effective judgments and appropriate responses to medical emergencies that occur in patients, such as timely informing the risk of hypoglycemia and emergency treatment plans when the patient's blood sugar is lower than 3.2mmol/L	Amended to "be able to effectively judge that a patient has a medical emergency and respond appropriately"	Adopt	Revise	Be able to effectively judge the occurrence of medical emergencies in patients and make appropriate responses, such as informing patients of the risk of hypoglycemia and emergency treatment plans in a timely manner when the patient's blood sugar is lower than 3.2mmol/L
1.8	For diseases that require a differential diagnosis, the patient will be actively asked and encouraged to state sufficient information to help identify the disease	Amended to "Proactively ask patients for relevant information that can be used to help differential diagnosis"	Adopt	Revise	Proactively ask the patient for relevant information that can be used to aid in the differential diagnosis
1.9	Inquiries are clear and focused	Amend it to "clear thinking about consultation"	Adopt	Revise	Inquiry ideas are clear and focused
2.0	Humanistic qualities			Reserve	Humanistic qualities
2.1	Demonstrate respect, sensitivity and empathy during consultations and communications	Amended to read "Respect, care and empathy for patients"	Adopt	Revise	Treat patients with respect, care and empathy during consultations
2.2	Effective patient conversation skills include: starting the conversation, exploring the issue, understanding the patient's perspective, organizing the discussion, building a good doctor-patient relationship and gaining the patient's trust, facilitating patient participation, explaining, planning, and closing the discussion	Amended to "Effective organization and convergence of the consultation process: Reasonable questioning, establishing a trusting relationship with patients and encouraging patients, obtaining comprehensive and accurate information, and guiding the end of the discussion"	Adopt	Revise	Effectively organize and converge the consultation process, including reasonable questioning, building a trusting relationship with the patient and encouraging the patient, obtaining comprehensive and accurate information, and leading the discussion to a conclusion
2.3	Reasonably respond to the patient's emotional performance during the conversation, such as appropriate emotional reassurance	Amended to "reasonably respond to patients' emotional performance in communication and provide appropriate emotional support"	Adopt	Revise	Coping reasonably with patients' emotional displays in communication and providing appropriate emotional support
2.4	Valuing patients' individual wishes in medical decision-making	Amended to "In the process of medical decision-making, the patient's personal wishes can be valued"	Adopt	Revise	Able to value the patient's individual wishes in the medical decision-making process
2.5	Avoid expressing opinions that are biased against certain groups of people	Amended to read "Avoid expressing any form of prejudice"	Adopt	Revise	Avoid expressions of bias of any kind
2.6	Be patient when explaining problems to patients	Amended to read "Treat patiently with and explain patient problems"	Adopt	Revise	Be patient with and explain patients' questions
2.7	Communicate with patients using appropriate and appropriate language	Amend to "polite and decent language in the communication process"	Adopt	Revise	Be courteous and appropriate in communication
2.8	Avoid inquiring about patient privacy when not necessary	Amended to "protect patient privacy, and avoid asking privacy-related questions when non-disease needs"	Adopt	Revise	Protect patient privacy and avoid asking privacy questions when not required by the disease
2.9	Reasonable handling of patients' non-medical appeals during dialogue	Changed to "reasonable response"	Adopt	Revise	Reasonably respond to non-medical demands of patients in dialogue
3.0	Comprehensive clinical diagnosis and treatment ability			Reserve	Comprehensive clinical diagnosis and treatment ability
3.1	Identify the primary and secondary content of the information provided by the patient, and respond reasonably. For example, for the patient's main complaint, you should focus on and inquire about the information that is helpful for judging the condition; Patients are more concerned about this and need to provide a reasonable explanation			Reserve	Identify the primary and secondary content of the information provided by the patient, and respond reasonably. For example, for the information provided by the patient, you should focus on and inquire about the information that is helpful for judging the condition; If the patient is more concerned about this, a reasonable explanation should be provided
3.2	Identify whether the information provided by the patient is reliable and provide further verification if necessary, e.g. if the patient states that he or she has a fever but does not have a temperature measurement, the information is not reliable			Reserve	Judging the credibility of the information provided by the patient and being able to verify it with appropriate questions, e.g. if a patient states that he or she has a fever but no temperature measurement is taken, the information is not reliable
3.3	Combine information provided by the patient to arrive at a reasonable initial (suspect) and differential diagnosis			Reserve	Combine information provided by the patient to arrive at a reasonable initial (suspect) and differential diagnosis
3.4	Consider the patient's condition and personal wishes, and propose an appropriate plan for definite diagnosis when the diagnosis basis is insufficient. The plan should include necessary means that help to confirm the diagnosis and do not include irrelevant means			Reserve	Consider the patient's condition and personal wishes, and propose an appropriate plan for definite diagnosis when the diagnosis basis is insufficient. The plan should include necessary means that help to confirm the diagnosis and do not include irrelevant means
3.5	Correctly explain to the patient the reasons for the proposed diagnosis	1. Revised to "correctly explain to the patient" 2. Items 3.5 and 3.6 are repeated	Adopt Suggestion 1	Revise	Correctly explain to the patient the basis for the proposed diagnosis
3.6	Correctly explain to patients the basis for the diagnosis of the disease and the basis for excluding other differential diagnoses			Reserve	Correctly explain to patients the basis for the diagnosis of the disease and the basis for excluding other differential diagnoses
3.7	Considering the patient's condition and personal wishes, combined with the patient's condition and diagnosis and treatment norms, propose the best treatment plan	1. Revised to "propose the most reasonable treatment plan" 2. Item 3.7 and item 2.4 are repeated	Adopt Suggestion 1	Revise	Considering the patient's condition and personal wishes, combined with the patient's condition and diagnosis and treatment norms, propose the most reasonable treatment plan
3.8	Correctly explain to patients the reasons for proposed treatment options			Reserve	Correctly explain to patients the reasons for proposed treatment options
3.9	Make necessary reminders and suggestions to patients on certain important medical concerns, such as reminders of drug incompatibility			Reserve	Make necessary reminders and suggestions to patients on certain important medical concerns, such as reminders of drug incompatibility
4.0	Overall clinicalcompetence			Reserve	Overall clinicalcompetence
4.1	Dissatisfied			Reserve	Dissatisfied
4.2	Satisfactory			Reserve	Satisfactory
4.3	Very Good			Reserve	Very Good
